5.16 Percentage change in compressive strengths of HPC at various concentrations of KCl 108
5.17 Split tensile strengths of HPC at various concentrations of KCl 108
5.18 Percentage change in split tensile strengths of HPC at various concentrations of KCl 108
5.19 Compounds and their intensities from XRD & SEM results of samples with KCl 115
5.20 Setting times of cement at various concentrations of Na$_2$SO$_4$ 120
5.21 Workability of Na$_2$SO$_4$ in terms of compaction factor 122
5.22 Workability of Na$_2$SO$_4$ in terms of vee-bee time 122
5.23 Compressive strengths at various concentrations of Na$_2$SO$_4$ 124
5.24 Percentage change in compressive strengths of HPC at various concentrations of Na$_2$SO$_4$ 125
5.25 Split tensile strengths of HPC at various concentrations of Na$_2$SO$_4$ 125
5.26 Percentage change in split tensile strengths of HPC at various concentrations of Na$_2$SO$_4$ 125
5.27 Compounds and their intensities from XRD & SEM results of samples with Na$_2$SO$_4$ 132
5.28 Setting times of cement at various concentrations of CaCO$_3$ 137
5.29 Workability of CaCO$_3$ in terms of compaction factor 139
5.30 Workability of CaCO$_3$ in terms of vee-bee time 139
5.31 Compressive strengths of HPC at various concentrations of CaCO$_3$ 141
5.32 Percentage change in compressive strengths of HPC at various concentrations of CaCO$_3$ 141
5.33 Split tensile strengths of HPC at various concentrations of CaCO$_3$ 141
5.34 Percentage change in split tensile strengths of HPC at various concentrations of CaCO$_3$ 142
5.35 Compounds and their intensities from XRD & SEM results of samples with CaCO$_3$ 148
6.1 Setting times of cement at various concentrations of Na$_2$CO$_3$ 155
6.2 Workability of Na$_2$CO$_3$ in terms of compaction factor 157
6.3 Workability of Na$_2$CO$_3$ in terms of vee-bee time 157
6.4 Compressive strengths of HPC cubes at various concentrations of Na$_2$CO$_3$ 159
6.5 Percentage change in compressive strengths of HPC at various concentrations of Na$_2$CO$_3$ 159
6.6 Split tensile strengths of HPC at various concentrations of Na$_2$CO$_3$ 159
6.7 Percentage change in split tensile strengths of HPC at various concentrations of Na$_2$CO$_3$ 160
6.8 Compounds and their intensities from XRD & SEM results of samples with Na$_2$CO$_3$  
6.9 Setting times of cement corresponding to various concentrations of NaHCO$_3$  
6.10 Workability of NaHCO$_3$ interms of compaction factor  
6.11 Workability of NaHCO$_3$ interms of vee-bee time  
6.12 Compressive strengths of HPC at various concentrations of NaHCO$_3$  
6.13 Percentage change in compressive strengths of HPC at various concentrations of NaHCO$_3$  
6.14 Split tensile strengths of HPC at various concentrations of NaHCO$_3$  
6.15 Percentage change in split tensile strengths of HPC at various concentrations of NaHCO$_3$  
6.16 Compounds and their intensities from XRD & SEM results of samples with NaHCO$_3$  
7.1 Setting times of cement corresponding at concentrations of CaCl$_2$  
7.2 Workability of CaCl$_2$ interms of compaction factor  
7.3 Workability of CaCl$_2$ interms of vee-bee time  
7.4 Compressive strengths of HPC cubes at various concentrations of CaCl$_2$  
7.5 Percentage change in compressive strengths of HPC at various concentrations of CaCl$_2$  
7.6 Split tensile strength of HPC at various concentrations of CaCl$_2$  
7.7 Percentage change in split tensile strengths of HPC at various concentrations of CaCl$_2$  
7.8 Compounds and their intensities from XRD & SEM results of samples with CaCl$_2$  
7.9 Setting times of cement at concentrations of MgSO$_4$  
7.10 Workability of MgSO$_4$ interms of compaction factor  
7.11 Workability of MgSO$_4$ interms of vee-bee time  
7.12 Compressive strengths of HPC at various concentrations of MgSO$_4$  
7.13 Percentage change in compressive strengths of HPC at various concentrations of MgSO$_4$  
7.14 Split tensile strength of HPC at various concentrations of MgSO$_4$  
7.15 Percentage change in split tensile strengths of HPC at various concentrations of MgSO$_4$  
7.16 Compounds and their intensities from XRD & SEM results of samples with MgSO$_4$
8.1 Setting times of cement at various concentrations of HCl 223
8.2 Workability of HCl in terms of compaction factor 225
8.3 Workability of HCl in terms of vee-bee time 225
8.4 Compressive strengths of HPC at various concentrations of HCl 227
8.5 Percentage change in compressive strengths of HPC at various concentrations of HCl 227
8.6 Split tensile strengths of HPC at various concentrations of HCl 227
8.7 Percentage change in split tensile strengths of HPC at various concentrations of HCl 228
8.8 Compounds and their intensities from XRD & SEM results of samples with HCl 234
8.9 Setting times of cement at various concentrations of H$_2$SO$_4$ 239
8.10 Workability of H$_2$SO$_4$ in terms of compaction factor 241
8.11 Workability of H$_2$SO$_4$ in terms of vee-bee time 241
8.12 Compressive strengths of HPC at various concentrations of H$_2$SO$_4$ 243
8.13 Percentage change in compressive strengths of HPC at various concentrations of H$_2$SO$_4$ 244
8.14 Split tensile strengths of HPC at various concentrations of H$_2$SO$_4$ 244
8.15 Percentage change in split tensile strengths of HPC at various concentrations of H$_2$SO$_4$ 244
8.16 Compounds and their intensities from XRD & SEM results of samples with H$_2$SO$_4$ 251

8.33 Split tensile strength of HPCs with H$_2$SO$_4$ concentrations 249
8.34 % decrease in split tensile strength of HPCs with H$_2$SO$_4$ concentrations 249
8.35 XRD patterns of sample of CHPC produced with H$_2$SO$_4$ mixed water 252
8.36 XRD patterns of sample of PHPC produced with H$_2$SO$_4$ mixed water 252
8.37 XRD patterns of sample of MHPC produced with H$_2$SO$_4$ mixed water 253
8.38 SEM photograph of sample of CHPC produced with H$_2$SO$_4$ mixed water 253
8.39 SEM photograph of sample of PHPC produced with H$_2$SO$_4$ mixed water 254
8.40 SEM photograph of sample of MHPC produced with H$_2$SO$_4$ mixed water 254
