# Contents

1 INTRODUCTION 1

1.1 Introduction ................................. 1

1.1.1 Supply Chain and its structure ............. 1

1.1.2 Supply Chain Management .................. 3

1.1.3 Coordination .............................. 4

1.1.4 Contracts as coordination mechanism ......... 6

1.2 Uses of Game theory in supply chain management .... 9

1.2.1 Non-cooperative Game ....................... 9

1.2.2 The equilibrium of the game ............... 10

1.2.3 Cooperative Game .......................... 11

1.3 Bargaining ..................................... 12

1.3.1 Nash Bargaining Model .................... 13

1.3.2 Alternating offer bargaining model ......... 14

1.3.3 Relation between Nash bargaining model and alternating offer bargaining model ........ 15

1.4 Important issues highlighted in the thesis ........ 15

1.4.1 Corporate Social Responsibility (CSR) ....... 15

1.4.2 Perishable Products ....................... 17

1.4.3 Imperfect Quality Products ................. 18

1.4.4 E-Business in supply chain ................. 19

1.4.5 Coordination in multi-echelon multi-member supply chain .......................... 20

1.5 Organization of the thesis ..................... 22

2 Exploring effect of CSR in Supply Chain .............. 24
2.1 Coordination and profit division in a two-echelon social responsible supply chain  
2.1.1 Model formulation and basic analysis  
2.1.2 Centralized and decentralized policy  
2.1.3 Effects of CSR on centralized and decentralized decisions  
2.1.4 Channel coordination and profit division  
2.1.5 Effects of CSR on the channel optimal decision  
2.1.6 Special cases  
2.2 Coordination and profit division in a three-echelon social responsible supply chain  
2.2.1 Model formulation and basic analysis  
2.2.2 Centralized policy  
2.2.3 Decentralized policy  
2.2.4 Channel coordination, ranges of win-win opportunities and surplus pure profit distribution  
2.2.5 Effects of CSR  
2.3 Coordinating a socially responsible distribution channel with revenue sharing contract  
2.3.1 Model formulation and basic analysis  
2.3.2 Decentralized policy  
2.3.3 Centralized policy  
2.3.4 Channel coordination using revenue sharing contract  
2.3.5 Effects of CSR on the channel coordinated decision  
2.4 Managerial implications and concluding remarks  
3 Perishable and imperfect quality products in SC  
3.1 Coordinating a three-echelon supply chain through disposal cost sharing and bargaining for surplus profit division  
3.1.1 Model formulation and basic analysis  
3.1.2 Surplus sharing  
3.1.3 Numerical illustration  
3.2 Coordinating a three-echelon distribution channel and benefit sharing considering perishable product  
3.2.1 Model formulation and basic analysis  
3.2.2 Decentralized policy
