CHAPTER I INTRODUCTION

I.1 Statement of the Problem
I.2 Objectives of the Study
I.3 Time Period Covered
I.4 Data and Sources of Data
I.5 Sample Size
I.6 Analysis of Data
   I.6.1 Analysis of Input Data
   I.6.2 Generation of Output Data
   I.6.3 Analysis of Output Data
I.7 Importance of the Study
I.8 Limitations of the Study
I.9 Chapter Scheme
PART I

II.1 Theories of Capital Structure
   II.1.1 Net Income Approach
   II.1.2 Net Operating Income Approach
   II.1.3 The Traditional View
   II.1.4 The Modigliani - Miller Hypothesis
   II.1.5 The Modigliani - Miller Hypothesis
       and the Corporate Taxes.

PART II

II.2 Computation of Cost of Capital
   II.2.1 Preference of Share Capital
   II.2.2 Equity Share Capital along with
       Retained Earnings
   II.2.3 Cost of Debentures and Long Term
       Loans
II.3 Weighted Average Cost of Capital
PART III

REVIEW OF LITERATURE

II.4 The Modigliani - Miller First Study
II.5 Modigliani - Miller Second Study
II.6 The Barges Study
II.7 The Wippern Study
II.8 Brigham and Gordon
II.9 The Weston Study
II.10 Haim Ben-Shahar
II.11 Douglas Vickers
II.12 Sarma and Rao's Study
II.13 Pandey's Study
II.14 Chakraborty's Study
II.15 Goyal's Study
II.16 Conclusion

CHAPTER III METHODOLOGY

III.1 Objectives of the Study
III.2 Data and their Sources
III.3 Time Period Covered
III.4 Sampling Technique
CHAPTER IV ANALYSIS OF CAPITAL STRUCTURE

IV.1 Factors Affecting Capital Structure

IV.2 Capital Structure - An Overall Analysis
   IV.2.1 Debt-Equity Ratio
   IV.2.2 Longterm Debts
   IV.2.3 Debentures
   IV.2.4 Preference Share Capital
   IV.2.5 Equity Share Capital
   IV.2.6 Retained Earnings

IV.3 Capital Structure - Industrywise Analysis
   IV.3.1 General Engineering Industry
   IV.3.2 Cement Industry
   IV.3.3 Paper Industry
   IV.3.4 Coffee Plantations
   IV.3.5 Cotton Textile Industry
   IV.3.6 Synthetic Textile Industry
   IV.3.7 Tea Plantations
CHAPTER V  ANALYSIS OF COST OF CAPITAL  120

V.1 Comparative Analysis of Cost of Capital:  A General Perspective
V.2 Weighted Average Cost of Capital - Industry-wise Analysis

V.2.1 General Engineering Industry
V.2.2 Cement Industry
V.2.3 Paper Industry
V.2.4 Coffee Plantations
V.2.5 Cotton Textile Industry
V.2.6 Synthetic Textile Industry
V.2.7 Tea Plantations
V.2.8 Electrical Industry
V.2.9 Chemical Industry
V.2.10 Automobile Industry

V.3 Capital Structure and Cost of Capital - Relationship

V.3.1 Debt-Equity - Weighted Average Cost of Capital
V.3.2 Retained Earnings - Weighted Average Cost of Capital
V.3.3 Equity base - Earnings to Equity
V.3.4 Variability in Earnings - Payout Ratio
V.3.5 Variability in Earnings - Debt-Equity
V.3.6 Variability in Earnings - Weighted Average Cost of Capital

V.4 Conclusion
CHAPTER VI
WEIGHTED AVERAGE COST OF CAPITAL
AND DEBT-EQUITY - A TREND ANALYSIS

VI.1 Trend Analysis
VI.2 Weighted Average Cost of Capital - An Overall Analysis
VI.3 Weighted Average Cost of Capital - Industry-wise Analysis
   VI.3.1 General Engineering Industry
   VI.3.2 Cement Industry
   VI.3.3 Paper Industry
   VI.3.4 Coffee Plantations
   VI.3.5 Cotton Textile Industry
   VI.3.6 Synthetic Textile Industry
   VI.3.7 Tea Plantations
   VI.3.8 Electrical Industry
   VI.3.9 Chemical Industry
   VI.3.10 Automobile Industry
VI.4 Debt-Equity Ratio - An Overall Analysis
VI.5 Debt-Equity Ratio - Industry-wise Analysis
   VI.5.1 General Engineering Industry
   VI.5.2 Cement Industry
   VI.5.3 Paper Industry
   VI.5.4 Coffee Plantations
VI.5.5 Cotton Textile Industry
VI.5.6 Synthetic Textile Industry
VI.5.7 Tea Plantations
VI.5.8 Electrical Industry
VI.5.9 Chemical Industry
VI.5.10 Automobile Industry
VI.6 Conclusion

CHAPTER VII \( \text{INFLUENCE OF SELECT RATIOS} \)
ON COST OF CAPITAL

VII.1 Factors Influencing Weighted Average Cost of Capital
VII.1.1 Debt-Equity Ratio (D/E)
VII.1.2 Price Earnings Ratio: (P/E)
VII.1.3 Return on Investment (ROI)
VII.1.4 Book Value to Market Price (BV/MP)
VII.1.5 Dividend Payout Ratio (DPR)
VII.1.6 Variability in Earnings (EV)
VII.1.7 Dividend Yield (DY)
VII.2 Multiple Regression Analysis
VII.3 Multiple Regression - An Overall Analysis
VII.4 Multiple Regression - Industry-wise Analysis
VII.4.1 General Engineering Industry
VII.4.2 Cement Industry
VII.4.3 Paper Industry
VII.4.4 Cotton Textile Industry
VII.4.5 Tea Plantations
VII.4.6 Electrical Industry
VII.4.7 Chemical Industry
VII.4.8 Automobile Industry
VII.4.9 Coffee Plantations
VII.4.10 Synthetic Industry

VII.5 Conclusion

CHAPTER VIII SUMMARY AND CONCLUSION

APPENDICES

Appendix A: List of Sample Companies
Appendix B: Proprietary Ratio - Analysis of Variance Tables
Appendix C: Ratio of Fixed Assets to Long Term Funds - Analysis of Variance Tables
Appendix D: Debt-Equity Ratio - Analysis of Variance Tables
