List of Tables

Table 2.1: The values of lattice constants and d spacing obtained from XRD 44

Table 2.2: The parameters obtained from Williamson-Hall analysis 48

Table 2.3: The values of lattice constants and d spacing obtained from XRD 50

Table 4.1: Parameters obtained by fitting the A1(LO) mode peak using the Gaussian equation 130

Table 4.2: Parameters obtained by fitting the A1(LO) mode peak using the Gaussian equation. 134

Table 5.1: The parameters obtained by fitting the experimental data to Cole-Cole equation at different temperatures 158

Table 5.2: The parameters obtained by fitting the experimental data to Cole-Cole equation at different temperatures 172

Table 5.3: The parameters obtained by fitting the experimental data to Cole–Cole equation at different temperatures 176

Table 6.1: The parameters obtained by fitting the experimental data to CBH model for a frequency $\omega = 62800$ s$^{-1}$ and a temperature of 373K 204

Table 6.2: Variation in the density of defect states in CdS nanoparticles and nanorods with temperature. 205
Table 6.3. The parameters obtained by fitting the experimental data to CBH model for a frequency $\omega = 100000 \text{ s}^{-1}$ and a temperature of 373 K.

Table 6.4: Variation in the density of defect states in ZnS nanoparticles and nanorods with temperature

Table 6.5: Activation energies obtained from the Arrhenius plots for thermally excited charge carriers in various samples
