ACKNOWLEDGEMENTS

There are many people whom I would like to thank for their support throughout my research program, but two stand out as the most important. These are my Ph.D. supervisors Prof. Arun K. Pujari and Prof. V. P. Gulati. My terrific supervisor Prof. Pujari has taught me to be a good and effective researcher by imparting advice on all technical issues. His very strict and demanding nature ensures that one understands the problem very well before proceeding. During the period of this work I had realized the importance of that kind of training. The best thing, apart from many others, that I could learn from him was the importance of an effective model building. Throughout my research, he has been very particular about implementing the ideas and show that work as expected. My second supervisor Prof. Gulati, apart from scanning my work and progress, has been very helpful in providing me very good infrastructure and resources. He has always shown confidence in me. In spite of his very busy schedule, he spared time for discussion and encouragement. In all, both of my supervisors contributed a lot in building my confidence as a good researcher. It was Dr. Gulati, who introduced me to this fascinating subject.

I would like to thank faculty of IDRBT - Dr. P. Radhakrishna and Dr. V. N. Sastry for their useful discussion, support, help and advice throughout my research. I would like to thank librarian of IDRBT – Shri P. Ratnakumar for his support and help. It would have been very difficult to pursue this research without their support. I would also like to thank Shri Pradeep Kumar of IDRBT. I also thank Shri D. P. Dube, faculty on duty from Reserve bank of India. I also thank Dr. R. B. Barman, Executive Director, Reserve Bank of India and Shri K. R. Ganapathy, Ex- Chief General Manager, for their support and encouragement. I also thank Dr. Patra, Ex-faculty of IDRBT for his help.

I am thankful to other colleagues and friends from IDRBT and Department of Statistical Analysis and Computer Services (DESACS) like Dr. Nag, Dr. A. M. Pedgaonkar, Dr. A. S. Ramasastrti, Shri K. Raj Kumar and many more, who have been a continuous source of encouragement. Directly or indirectly, they have contributed in the completion.

My special thanks go to Shri K. R. Vijay Raghavan and Mrs. Mythili Vijay Raghavan, who have painfully gone through this thesis and carried out corrections. I am deeply indebted to the love and support of all my family members. I also thank my parents for their support and encouragement.

A. R. Dani
