LIST OF FIGURES

Figure. 3.1 Main algorithm ........................................................................................................... 86
Figure. 3.2 Function - Creates Size Demand Table ............................................................ 87
Figure. 3.3 Function - Gets next unassigned bid .................................................................... 87
Figure. 3.4 Functions used in main algorithm findopasg....................................................... 88
Figure. 3.5 Function Assignment ......................................................................................... 89
Figure. 3.6 Comparative Performance of the Algorithm (assignment constraints) .... 90
Figure. 3.7 (a) Assignment Tree adjustment scenario Figure – 3.7(b) Assignment Tree excess supply scenario ........................................................................................................ 92
Figure. 3.8 Main algorithms ................................................................................................. 93
Figure. 3.9 Function to get optimum ask ............................................................................. 94
Figure. 3.10 – Functions used in main algorithm .............................................................. 95
Figure. 3.11 Functions used in algorithm findopasgic.......................................................... 96
Figure. 3.12 Comparative performance of algorithm ......................................................... 97
Figure. 3.13 – Algorithm for computation of VCG Payment ............................................ 107
Figure. 3.14 Effect of changes in prices on VCG Payoff and Contribution by a single buyer. (Horizontal line is VCG Payoff) ................................................................. 125
Figure. 3.15 Buyer’s expected gain and changes in bid prices (Single Buyer) ............... 125
Figure. 3.16 Effect of changes in VCG Payoff and Contribution Payment, when two participants change their respective prices. The payoff of one participant has been shown here. ........................................................................................................ 126
Figure. 3.17 Change in gain when two participants change their respective prices. The payoff of one participant is shown here ................................................................. 126
Figure. 3.18 Effect of price changes by more than two buyers on VCG Payoff and Contribution Payoff of two buyers. ................................................................. 127
Figure. 3.19 Change in gain of two buyers when more than two buyers change their prices ......................................................................................................................... 127
Figure. 4.1 Efficiency loss when bids in different order books have same distribution but different parameters ................................................................. 181
Figure. 4.2 Efficiency loss when bids in different order books have different distributions .......................................................................................................................... 182
Figure. 4.3 Effect of decrease in volume on gain. It indicates how gain of buyer decreases in case he decreases his volume ................................................................. 182
Figure. 4.4 Effect of false name – How the gain of buyer decrease by submitting false name bids ............................................................................................................. 183
Figure. 5.1. Algorithm for Forward Auction ................................................................. 204
Figure. 5.2. Algorithm for Reverse Auction................................................................. 205
Figure. 5.3 Comparative performance of the algorithms ............................................. 207
Figure. 5.4. Algorithm for Multi Unit Auction............................................................. 214
Figure. 5.5. Algorithm for VCG pay off.................................................................... 217
Figure. 5.6- Effect on gain due to change in demand. It indicates how gain of buyer
decreases in case he decreases his volume ............................................................. 227
Figure. 5.7 – Effect of False Name Bids. How the gain of buyer decrease by submitting
false name bids...................................................................................................... 228
