ACKNOWLEDGEMENTS

I am indeed grateful to Prof. C. Arulsamy, former Principal, Chikkaiah Naicker College, Erode, Prof. A. George Stephen, Principal of Chikkaiah Naicker College, Erode and to Prof. R. Athmanaban, Head of the Department of Economics for permitting me to enroll as a part-time research scholar in their esteemed institutions.

I am greatly indebted to my guide Dr. A. Sarvalingam, Reader, Department of Economics, Chikkaiah Naicker College, Erode for his invaluable guidance and supervision. Despite his multifarious activities, he has extended constant encouragement and irrefragable assistance, in the preparation of this thesis work and has enabled me to complete it on time. In fact, his patience, kindness and generosity went far beyond the responsibilities of a supervisor. I am grateful to him.

I also express my sincere thanks to the other members in the Department of Economics, Chikkaiah Naicker College, Erode.

I am also indebted to the Department of Public Health and Preventive Medicine, Tamil Nadu for permitting me to do this Ph.D.

I am deeply thankful for the love, support, and encouragement of my family members and friends.

I am highly indebted to the SYSTAT CO, Chicago for providing the statistical tools which are very useful for my analysis.
