ACKNOWLEDGEMENTS

First and foremost I want to thank my Ph.D. Supervisor Dr. Sanjay Gupta. It has been an honour to be his first Ph.D. student. I would like to thank him for all the hope and trust he has put on me, before I thought I could do any research at all. He has taught me how good experimental biology is done and the importance of control experiments. I am thankful for all his contributions of time, ideas, and funding to make my Ph.D. experience memorable. It was his energy and efforts that made sure that I, and everyone else in the lab, was truly interested in whichever project we were working on. He provided direct feedback and support when it was required. His constructive comments, enthusiastic approach towards science and positive advice were essential and helpful not only for the completion of my thesis, but also for the life ahead.

The good advice, support and encouragement of my Co-supervisor, Dr. Reema Gabrani, has been invaluable on both an academic and a personal level, for which I am extremely grateful. I would like to extend my thanks to her for all the effort and time she has spent in improving my skills of scientific writing.

I would also like to acknowledge the academic and technical assistance of the Department of biotechnology since the start of my Ph.D. in 2007 especially the Head of Department, Prof. Sanjeev Sharma for giving a perfect working environment in the lab.

I would like to thank honorary group members of the University, Founder of the University Shri J. P. Gaur, CEO Prof. Y. Medury, Vice Chancellor Prof. S. C. Saxena, Dean Prof. Krishna Gopal, Registrar Col. Vijay Kumar and all members of JIIT family without their support this work would not have been possible.

I also want to express my gratitude to Mr. Narendra Yadav, Mrs. Priyanka Banerjee, Mr. Subhash Jha, Mr. Rajkumar, Mr. Kamal and Mr. Kaushal, who have graciously helped me to use the lab equipments and supplies when needed.

I have had the pleasure to work with several undergraduate students, Akaash Mishra and Sahil Gulati in particular over the past 6 years. They helped me through my work and stood by me in tough times of my Ph.D.

My time at JIIT was made enjoyable in large part due to my friends that became a part of my life. I am grateful for quality time spent with Namrata Dudha, Jyoti Rana, Sreejith R. and Gajendra Singh. Mere thanks cannot suffice for the emotional and moral support rendered by
them during the rough patches of my Ph.D. I appreciate their valuable advice in my project. This thesis is dedicated to my Husband Piyush, for his perpetual support in difficult moments, for being my greatest strength and for believing in me without “if and but”. It is dedicated to my loving and joyful daughter Kashvi who unknowingly supported me for being patient and by acting as a stress buster. It is dedicated to my parents and family, for giving me the chance to realize my dreams. I would like to thank them for their unconditional support, advice and help throughout my Ph.D, and also because they have always wanted me to excel in life. This thesis is also dedicated to all the ones who cared about me in these long years. Finally, I am grateful to the almighty for giving me this wonderful life and a great family.

Kapila Kumar
