ACKNOWLEDGEMENTS

First and foremost, I would like to thank my supervisor, Dr. Balwinder Singh Randhawa (Head, Professor, Department of Chemistry, Guru Nanak Dev University, Amritsar) for his continuous support in the project work. He was always there to listen and give advice. He showed me different ways to approach a research problem and the need to be persistent to accomplish the goal. Without his encouragement and constant guidance, I could not have finished this dissertation. I will always remain grateful to him for providing an opportunity to work under his able guidance.

I owe my sincere thanks to Dr. Ishtiaque Ahmad and Dr. Subodh Kumar (Head, Department of Chemistry, Guru Nanak Dev University, Amritsar) for providing laboratory facilities. I must acknowledge the Faculty of Chemistry Department, Guru Nanak Dev University, which has been instrumental for my academic achievements. I am also thankful to non-teaching, library and technical staff, which have been very supportive throughout my academic career.

I also take this opportunity to express my gratitude to Dr. Nitendar Kumar (Scientist ‘F’, SSPL, DRDO, New Delhi) and Dr. R.K.Kotnala (Scientist ‘G’, NPL, New Delhi) for recording magnetic data.

Also thanks to the Folks at the Chemistry Department for interesting discussions and being fun to be with.

Last, but not least, I thank my family for giving me life in the first place, for unconditional support and encouragement to pursue my studies.

Financial assistance provided by CSIR, New Delhi, is gratefully acknowledged.

(Manik Gupta)
