ACKNOWLEDGEMENTS

I thank all the people who helped me complete this thesis, with a few mentioned below.

I would like to state that this doctoral research is funded by the Junior and Senior Research Fellowship provided by University Grants Commission and Human Resource Development Group at Council for Scientific and Industrial Research, India.

I express my gratitude to my supervisor, Dr. A.P. Dimri, for his scholastic support and constant guidance. His encouragement towards good research, critical discussions and vital corrections made this thesis possible. I would like to acknowledge Prof. K.G. Saxena, Prof. Sudha Bhattacharya and Prof. A.K. Attri, as successive Deans, School of Environmental Sciences. Along with them I thank all the teaching, technical and administrative staff of Jawaharlal Nehru University, for providing the support required for the completion of my doctoral work. I convey my gratitude to Prof. V.K. Jain, Dr. J.K. Tripathi, Dr. S. Sreekesh for their invaluable insights.

I would like to thank all the experts in their fields whom I sought to increase my knowledge and who were kind enough to help me understand; Dr. Someshwar Das, Dr. Udaya Bhaskar Gunturu, Dr. Anil Kumar, Dr. Dev Niyogi, Dr. R. Thayyen, Dr. S.C. Bhan, Dr. Abhijit Sarkar, Dr. Geeta Agnihotri, Dr. Dipak Sahu, Dr. Prashant Kumar, Ms. Shweta Das and Ms. Shraddha Vohra. I would specially like to thank all the numerous people on different online forums for providing me with solutions which helped a lot during my thesis.

I would like to extend a special thanks to my senior Pyarimohan Maharana for providing me academic aid during the course of my doctorate. He is the pillar of patience
and perseverance, without whom I would have not been able to complete my doctorate. A special mention for our lab staff Gajender Singh Ji, for his unwavering assistance and for sharing with us his vast wisdom. A big thank you to my lab-mates, Jigmey Bhutia, Preeti Gunwani, Anubhav Chowdhary, Madhavi Jain, Saurabh Kumar, Anamika Shikha and Rinku Devi for their continued interest and enthusiasm.

I would like to mention the names of my dearest colleagues and friends from School of Environmental Sciences; Chinmaya Maharana, Shweta Kaur and Jyoti Singh. They were my comrade in arms during the entirety of my tenure at Jawaharlal Nehru University. Along with my friends Prashant Agnihotri, Videesha Agnihotri, Preeti Aggarwal, Ritu Singh, Nipun Goel, Naveen Jindal, Anuradha Gupta and my dearest cousins Shivali, Deepa and Vaishali. I would like to acknowledge my dependence on them during the positive as well as the negative times. They gave me strength and support for forging forward in my endeavour. I include gratitude towards my stress buster Buffy.

As the dedication of the thesis indicates, the most important people I would like to acknowledge here would be my family, as to them is what I owe my success to. I would never be able to express in words as to how much important my parents, Uma Narayan and C.R.K. Hari, are for what I am today. And even a generation older my grandparents, Gyana Prasunamba, C. Rama Rao, Shayamala Narayan and G.V. Suryanarayan, were always a source of encouragement to aim higher. I would also like to thank my husband Aneesh and in-law Bala Kumari aunty for their patience and understanding.

Last but the most important, I humbly acknowledge God as the One influencing my Fate.

Amulya Chevuturi
