Fig. 1. Location map of the study area.
Fig. 3. Soil distribution map.
Fig. 27. Classification of open wells with respect to depth.

Fig. 28. Classification of open wells with respect to water level fluctuation.
Fig. 29. Map showing spatial variation in depth to static water level.
Fig. 30. Map showing water table contours (Premonsoon).
Fig. 51. Map showing water table contours (Postmonsoon).

- Direction of groundwater movement
- Observation wells
- Water table contours
Fig. 32. Map showing water table fluctuation.
Fig. 33. Water table fluctuation profile.
Fig. 54. Relation between rainfall and water level.
Fig. 55. Classification of bore wells with respect to (a) yield, (b) depth.

Fig. 56. Depth and yield relations of bore wells.

Fig. 57. Classification of bore wells with respect to casing.
Fig. 28. Location map of pumping test wells and VES.
Fig. 29. Typical curve (Theis recovery, 1963 method).

\[
T = \frac{2.303 Q}{4 \pi \Delta s} = \frac{2.303 \times 274.75}{4 \times 22 \times 0.135} = 372.83 \text{ m}^2/\text{day}
\]
Fig. 40. Typical curve (Papadopulos and Cooper, 1967 method).
Fig. 41. Typical curve (Mishra and Chachadi, 1985 method).
Fig. 42. Map showing spatial variation in transmissivity values.
Fig. 43. Slitcher's solution for determining specific capacity.

\[
\log \frac{s_1}{s_2} = 0.07
t' = 20\%
\]
