</tbody>
</table>
29. Map showing spatial variation in depth to static water level.
30. Map showing water table contours (Premonsoon).
31. Map showing water table contours (Postmonsoon).
32. Map showing water table fluctuation.
33. Water table fluctuation profile.
34. Relation between rainfall and water level.
35. Classification of bore wells with respect to yield and depth.
36. Depth and yield relations of bore wells.
37. Classification of bore wells with respect to casing.
38. Location map of Pumping test wells and VES.
40. Typical curve (Papadopoulos and Cooper, 1967 method).
41. Typical curve (Mishra and Chachadi 1985, method).
42. Map showing spatial variation in transmissivity values.
43. Slitcher's solution for determining specific capacity.
44. Productivity frequency plot for wells.
45. Classification of wells with respect to transmissivity and hydraulic conductivity.
46. Relation between specific capacity, area of cross-section, depth and transmissivity.
47. 
48. Typical VES curves.
49. 
50. Geoelectrical cross-sections.
51. Geoelectrical fence diagram.
52a. VES curves, electrical logs and lithologic logs (Shale).
52b. VES curve, electrical logs and lithologic logs (Phyllite).
53. Well hydrograph (Bidinhal, Hubli).
54. Well hydrograph (Saptapur, Dharwad).
55. Collin's bar diagram (Hubli urban area).
56. Collin's bar diagram (Dharwad urban area).
57. Location and Ca ranges of groundwater samples (Hubli urban area).
58. Location and Cl ranges of groundwater samples (Hubli urban area).
59. Location and TH ranges of groundwater samples (Hubli urban area).
60. Location and TDS ranges of groundwater samples (Hubli urban area).
61. Location and Ca ranges of groundwater samples (Dharwad urban area).
62. Location and Cl ranges of groundwater samples (Dharwad urban area).
63. Location and TH ranges of groundwater samples (Dharwad urban area).
64. Location and TDS ranges of groundwater samples (Dharwad urban area).
65. Location and Ca ranges of groundwater samples (Suburban area).
66. Location and Cl ranges of groundwater samples (Suburban area).
67. Location and TH ranges of groundwater samples (Suburban area).
68. Location and TDS ranges of groundwater samples (Suburban area).
70. Classification of irrigation water (Wilcox, 1948).
71. Plots of component scores (Hubli urban area).
72. Plots of component scores (Dharwad urban area).
73. Plots of component scores (Suburban area).
74. Location map of groundwater samples along/across sewage course (Hubli urban area).
74a. Classification of wells with respect to concentration of trace elements.
75. Plots of component scores (Hubli urban area).
76. Seasonal variation in groundwater quality.
77a. Chemical types of groundwaters (Hubli urban area).
77b. Chemical types of groundwaters (Dharwad urban area).
77c. Chemical types of groundwaters (Suburban area).
77d. Chemical types of groundwaters (Hubli urban area).
78a. Chemical facies of groundwaters (Hubli urban area).
78b. Chemical facies of groundwaters (Dharwad urban area).
78c. Chemical facies of groundwaters (Suburban area).
78d. Chemical facies of groundwater (Hubli urban area).
79a. **Mechanisms controlling groundwater chemistry (Hubli urban area).**

79b. **Mechanisms controlling groundwater chemistry (Dharwad urban area).**

79c. **Mechanisms controlling groundwater chemistry (Suburban area).**

79d. **Mechanisms controlling groundwater chemistry (Hubli urban area).**

80. [ ]

81. [ ] Field photos showing open drainage carrying domestic/industrial sewage.
