**Figure 11A.** Oxygen consumption (litre/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

**Figure 11B.** Oxygen consumption (litre/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

**Figure 12A.** Heart rate (beats/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

**Figure 12B.** Heart rate (beats/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

**Figure 13A.** Oxygen pulse (ml/beat) in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

**Figure 13B.** Oxygen pulse (ml/beat) in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

**Figure 14A.** Ventilation (litre/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

**Figure 14B.** Ventilation (litre/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

**Figure 15A.** Breathing frequency (breaths/min) in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice
Figure 15B. Breathing frequency (breaths/min) in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

Figure 16A. Tidal volume (litre/breath) in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

Figure 16B. Tidal volume (litre/breath) in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

Figure 17A. Carbon dioxide output (litre/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

Figure 17B. Carbon dioxide output (litre/min.) in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

Figure 18A. METS value in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

Figure 18B. METS value in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

Figure 19A. Ventilatory equivalent for oxygen in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice

Figure 19B. Ventilatory equivalent for oxygen in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

Figure 20A. Ventilatory equivalent for carbon dioxide in different postures of Surya Namaskar by slow and fast practitioners in the 1st round of their practice
Figure 20B. Ventilatory equivalent for carbon dioxide in different postures of Surya Namaskar by slow and fast practitioners in the 2nd round of their practice

Figure 21. Frequency of the Surya Namaskar practitioners within each time intervals

Figure 22. Percentage distribution of the Surya namaskar practitioners within each time interval.

Figure 23. Mean time (±s.d) in each postures of Surya Namaskar expressed as percentage of the total time duration in slow and fast practitioners in the 1st and 2nd round.
