 acknowledgements

Mere words are not sufficient to express the heartfelt and sincere thanks to the guide Dr. N. Murugan, Professor in Mechanical Engineering, who motivated the author to a very great extent to carry out his doctoral research. He held a number of useful discussions with the author and helped him a lot to complete this thesis.

The author takes this opportunity to express his sincere gratitude to the Management, the Head of the institution, Dr. R. Prabhakar, B.Tech. (IITM), M.S. (OSU, USA), Ph.D. (Purdue University), and the Head of the Department of Mechanical Engineering, Dr. S. Dhandapani, M.E., Ph.D., Coimbatore Institute of Technology, Coimbatore, for encouraging him and providing all the necessary facilities to carry out this research work.

The author extols his immeasurable thanks to Dr. V. Selladurai and the other faculty members and staff of the Department of Mechanical Engineering of this college for the continued encouragement and support.

The author is grateful to Dr. N. Murugan, Professor in-charge of Surface Engineering Laboratory, Welding Research Cell, Coimbatore Institute of Technology, Coimbatore for having extended all facilities to carry out the color Metallography test and Corrosion test with advanced computer interfaced equipments.

The author expresses his heartfelt thanks to Dr. P. Koshy Mathews, Assistant Professor of Mechanical Engineering, Coimbatore Institute of
Technology, Coimbatore for having shared his research and academic experience to make this work more purposeful.

The author thanks M/s. KSB Pumps Limited, Coimbatore for the helpful technical discussions to set the experiments more application oriented and providing the materials for conducting experiments. The All India Council for Technical Education, New Delhi is gratefully acknowledged for having provided full financial support for this project.

Heartfelt thanks to the Principal, Head of the Department of Metallurgical Engineering, PSG College of Technology, Coimbatore, for having provided facilities to conduct the wear test.

The author expresses thanks to the Faculty incharge of Survey laboratory Coimbatre Institute of Technology, Coimbatore for having provided facilities for the measurement of area of bead profiles.

The author thanks M/s. LG Equipment Ltd, Coimbatore for having provided all the facilities to carry out the measurement of the bead profiles.

Heartfelt thanks to Dr. G. Bhuvanasekaran, Welding Research Institute, BHEL, Trichy for having shared his industrial and research experience to make this work more purposeful.

In warm hearted state and with pleasure the author would like to place profound thanks to the Management, the Principal, Dr. K. Thyagarajah and the faculty members of Department of Mechanical Engineering, P.S.N.A. College of Engineering and Technology, Dindigul, for providing necessary environment and encouragement in completing
the research work. The help provided by Mr. A. Ramakrishnan, Deputy Controller of Students Affairs is sincerely acknowledged.

The author is very much grateful to his beloved parents who pray for his welfare even at the age of eighty, wife Mrs. S Poongothai and son S.Arvindh for their moral support, continuous encouragement and shoudering much of his domestic responsibilities for more than ten years during the period of his research work enabling him to spend enough time for his research activities.

R. SHANMUGAM
