I am not following merely a convention while acknowledging my thanks here rather. I am honoured to express my gratitude to my supervisor, Dr. Ishwar Singh, Reader, Chemistry Department, M.D. University, Rohtak. Without his professional and expert guidance the completion of this work would not have been simply possible. He is also a personality from whom I learned and realised the word "patience" - an essential quality of a good researcher.

My heartfelt thanks and gratitude to Prof. K.S. Sharma, Chemistry Department, M.D. University, Rohtak for his lively interest and constructive criticism during the course of this work.

I am grateful to Prof. O.P. Aggarwal, Head, Chemistry Department, M.D. University Rohtak, for providing necessary facilities in course of present studies.

I am happy to acknowledge Dr. J.K. Makarndi and Dr. Pratap Singh Kadyan for their friendly and co-operative behaviour and criticism. They were helpful in dealing with many theoretical and practical problems at the initial stages of this work.

Mere words can not express my gratitude towards my parents who are always trying to make the life a bit less difficult for me.

A special word of thanks for Miss Anju, whose co-operative attitude and willing assistance, whenever called upon, has been of immense benefit to me.
Should I thank my professional and personal friends of M.D. University as well as of other establishments especially of Medical College, Rohtak for their pleasant association which helped to restore the confidence that appeared to betray me occasionally.

And lastly, the financial assistance from Maharishi Dayanand University, Rohtak is gratefully acknowledged.

Rohtak
