ACKNOWLEDGEMENT

mukam karoti vachalam pangum lamghayete girim
yatkripa tamaham vande paramananadamadhavam

Rearing a child to be a good citizen involves a lot of love, care and sacrifice. I acknowledge my parents not only for their constant unconditional support during the thesis work but also for their life-time sacrifice which made me able to stand and compete with the world; keeping in mind that mere acknowledgement will not full-fill my duties towards them.

Acquiring knowledge is not an overnight job; it involves day to day experience in and outside classrooms. I offer my silent thanks to all my teachers, who directly or indirectly taught me the secrets of Mother Nature. I would also like to convey my sincere regards to all the known and unknown contributors of science, whose lifetime efforts brought us more and more close to the understanding of our Mother Nature.

I am thankful to both my research supervisors Dr. T. Adak and Dr. S.K. Gakhar, in the company of whom I learned the applied aspect of science: designing and execution of experiment and interpretation of data. Besides permitting me to become a part of their laboratories and bestowing me with their valuable time, these rare combinations of intellect, wisdom and nobility not only introduced me to the art of solving scientific problems, but also provided me their valuable guidance on the path. The words in my vocabulary are insufficient to express my sense of gratitude for these highly esteemed souls.

I convey my sincere regards to Dr. S.K. Subbarao, former Director, National Institute of Malaria Research, (the then Malaria Research Center) Delhi for allowing me to join and providing me the facilities at the Institute for my PhD. I pay my indebt gratitude to Prof. A.P. Dash, Director, NIMR for extending the Institutional facilities to me. I am also thankful to Prof B.K. Behra, Director, Advanced Center of Biotechnology for providing necessary facilities at the department.

I am grateful to Dr. S.N. Mishra of M.D. University and Sh. O.P. Singh, Dr. C.P. Batra and Dr. N. Nanda of NIMR for their help and kind advice whenever required. I am also thankful to Dr. Raj Bhatnagar, group leader, Insect Resistance Group, ICGEB and all
the members of his laboratory, especially Dr. R. Rajagopal, Dr. Janneth Rodrigues, Dr. Neema Agrawal and Mr. Naresh Arora for helping me in molecular biological work.

Thanks are due to all my colleagues especially, Dr. Rajni Kant, Dr. Sarita Verma, Dr. Kanchan Makkar, Dr. Monika Gulia of M.D. University Rohtak and Dr. Nibedita Das, Dr. Asha Kaul, Dr. S.S. Mohanti, Ms. A. Mehrunissa and Mr. Hardev Parasher of National Institute of Malaria Research for helping me in various forms during my research work.

I will fail in my duties, if I will not acknowledge the support of various staff at M.D. University and National Institute of Malaria Research, be it scientific, technical, administrative staff or staff involved in maintenance work. The insectary, laboratory and animal house staff of NIMR especially Mr. Pritam Singh, Mr. V.K. Soni, Mr. Kanwar Singh, Darshan Singh, Mr. M.S. Mehra, Mr. Bhopal Ram, Mr. Uttam Singh, Mr. BirPal Singh Rana, Mr. Lakshman Singh Papola, Mr. Pratap Singh, Mr. Praveen Kumar, Mr. Sanjeev Kumar, Mr. Subhash Verma and Mr. Ram Varun who helped me a lot in maintenance of mosquitoes and rodent malaria parasite and animals.

Some faces are standing behind and just smiling without the expectations of thanks or acknowledgement; these faces are none other than my family members and friends. I convey my silent thanks to my family members—my parents, my sisters Sunita, Anita, Vinita and Kiran and my wife Lalita for whatever they contributed directly or indirectly to the thesis. Not only my family members, my thanks are also due to all the relatives of maternal and paternal side and also the residents of my village, who supported my morale by showering unconditional love on me.

At last but not least I would like to thank Indian Council of Medical Research, Delhi, the parent organization of NIMR and University Grant Commission which provided me Research fellowship for this work under ‘UGC Fellowship Scheme’.
