LIST OF FIGURES

Figure 1-1: Establishing the Research Premise ................................................................. 6
Figure 2-1: Eight Domains of Quality of Life ................................................................. 17
Figure 2-2: Health Benefits of Green Spaces ................................................................. 22
Figure 2-3: Benefits of Urban Green Spaces ................................................................. 24
Figure 2-4: Benefits of Green Spaces .............................................................................. 25
Figure 2-5: Types of Leisure Constraints ........................................................................ 36
Figure 2-6: Factors influencing Physical Activity Participation .................................... 38
Figure 2-7: Women’s Dressing Room in Roman Bath .................................................. 49
Figure 2-8: Anguri Baug, Agra Fort ................................................................................ 49
Figure 2-9: Zanana Enclosure Lotus Mahal at Hampi ................................................... 51
Figure 2-10: Adalaj Stepwell, Gujarat ....................................................................... 51
Figure 2-11: Pakka Ghat of Mirzapur ....................................................................... 51
Figure 2-12: Women’s Ghat, Savant-wadi ................................................................. 51
Figure 2-13: Pakistan’s Women-only Park .................................................................... 52
Figure 2-14: Zenana Baug, Delhi ............................................................................... 52
Figure 2-15: International Women’s Day March, 1971 .............................................. 54
Figure 2-16: Public Spaces Design Indicators ........................................................... 57
Figure 2-17: Women Friendly City Project, Seoul .......................................................... 60
Figure 2-18: Women-friendly restrooms ................................................................. 61
Figure 2-19: Women-friendly parking lots ............................................................... 61
Figure 2-20: Women-friendly sidewalks ................................................................. 61
Figure 2-21: Women-friendly parks ........................................................................... 61
Figure 2-22: Attempts towards addressing social construction of gender through architectural design and signages, Vienna ......................................................... 61
Figure 2-23: Gender mainstreaming in spatial planning, Berlin ................................ 62
Figure 2-24: Banner questioning women’s safety in India ......................................... 63
Figure 2-25: Bus stand at Cochin, Kerala flooded with female travellers .................. 63
Figure 3-1: Model for Research Design .................................................................. 75
Figure 3-2: Research Design – Grounded Theory Approach .................................... 76
Figure 3-3: Research Design – Questionnaire Survey .............................................. 77
Figure 3-4: Integrative Approach with Various Methods of Inquiries ...................... 80
Figure 3-5: Multiple Photo Sorting Method – Survey Design ............................... 87
Figure 3-6: Coding Process: Multiple Photo Sorting .............................................. 90
Figure 3-7: Behavioral Mapping – Survey Design ................................................... 93
Figure 3-8: Collier’s Matrix – Adapted for Behavioral Mapping Survey .................... 99
Figure 3-9: Coding Process – Behavioral Mapping Survey ...................................... 100
Figure 3-10: Methods and Flexibility in Interviews .................................................... 101
Figure 3-11: Survey Design – Semi-structured, In-Depth Interviews ...................... 103
Figure 3-12: Semi-structured, In-Depth Interviews – Coding Process .................... 105
Figure 3-13: Factors Influencing Use of Leisure Spaces .......................................... 106
Figure 3-14: Formulation of Hypothesis by Grounded Theory Method .................. 107
Figure 3-15: Geographical Strata / Zones selected in Mumbai Metropolitan Region (Urban) .................................................................................................................. 115
Figure 4-1: Multiple Photo Sorting Survey : Selection of Photographs : Part I ........ 120
Figure 4-2: Multiple Photo Sorting Survey : Selection of Photographs : Part II ....... 121
Figure 4-3: Multiple Photo Sorting Survey : Selection of Photographs : Part II ....... 122
Figure 4-4: Observations in the form of Matrix: Stage II ......................................... 126
Figure 4-5: Preferences for Lakefront ....................................................................... 127
