LIST OF FIGURES

Fig. 2.1: Map showing the sampling locations for the distribution and abundance of *P. erosa*

Fig. 2.2: Map of Chorao island showing the sampling site for *P. erosa*

Fig. 3.1a: *P. erosa*, shell valve (External view)

Fig. 3.1b: *P. erosa*, interior view of the left shell valve

Fig. 3.1c: *P. erosa*, interior view of the right shell valve

Fig. 3.2: Size distribution of adult *P. erosa* in the mangroves along the central west coast of India

Fig. 3.3: Regression of soft tissue weight of *P. erosa* on shell length

Fig. 3.4: Size frequency distribution of *P. erosa* in different months at Chorao Island, Goa

Fig. 3.5: Mean length of males and females of *P. erosa* in different months

Fig. 3.6: Percentage of *P. erosa* observed in different size classes at Chorao island

Fig. 3.7: Percentage of male and female *P. erosa* in different months

Fig. 3.8: Percentage of male and female *P. erosa* in different length groups

Fig. 3.9: The asymptotic length of *P. erosa* estimated for Chorao Island population

Fig. 3.10: Shell length and total weight relationship of *P. erosa*

Fig. 3.11: Shell width and total weight relationship of *P. erosa*

Fig. 3.12: Shell depth and total weight relationship of *P. erosa*

Fig. 3.13: Relationship of shell length and total weight of males and females of *P. erosa* in different seasons

Fig. 3.14: Shell length and total weight relationship of female *P. erosa* during monsoon

Fig. 3.15: Shell length and weight relationship of female *P. erosa* during post-monsoon

Fig. 3.16: Shell length and total weight relationship of male *P. erosa* during monsoon

Fig. 3.17: Shell length and total weight relationship of male *P. erosa* during
post-monsoon

**Fig. 3.18:** Shell length and total weight relationship of male and female *P. erosa* during monsoon

**Fig. 4.1:** Monthly variation in pore and estuarine water temperature at Chorao island

**Fig. 4.2:** Monthly variation in pore and estuarine water pH at Chorao island

**Fig. 4.3:** Monthly variation in pore and estuarine water salinity at Chorao island

**Fig. 4.4:** Monthly variation in pore and estuarine water DO at Chorao island

**Fig. 4.5:** Monthly variation in pore and estuarine water nitrite concentration at Chorao island

**Fig. 4.6:** Monthly variation in pore and estuarine water nitrate concentration at Chorao island

**Fig. 4.7:** Monthly variation in pore and estuarine water phosphate concentration at Chorao island

**Fig. 4.8:** Monthly variation in Chl *a* in estuarine water and surface sediment at Chorao island

**Fig. 4.9:** PCA ordination plot of the two factors for the environmental variables of Chorao island

**Fig. 4.10:** Relationship between the estuarine water Chl *a* content and nitrate concentration

**Fig. 4.11:** Relationship between Condition Index of *P. erosa* and estuarine water nitrate concentration

**Fig. 4.12:** Relationship between estuarine water temperature and Chl *a* content

**Fig. 4.13:** Relationship between estuarine water salinity and Chl *a* content

**Fig. 4.14:** Relationship between wet tissue wt. of *P. erosa* and Chl *a* content

**Fig. 4.15:** Relationship between dry tissue wt. of *P. erosa* and Chl *a* content

**Fig. 4.16:** Phytoplankon species in the gut of *P. erosa* from Chorao island

**Fig. 5.1:** Distribution of mangrove clam *P. erosa* along the west coast of India

**Fig. 5.2:** Density of *P. erosa* at different locations along the central west coast of India

**Fig. 5.3:** Mean density of *P. erosa* at Chorao island
Fig. 5.4: Frequency of *P. erosa* in different size classes at Chorao island

Fig. 5.5: Monthly variation in temperature at different tide levels in Chorao island

Fig. 5.6: Monthly variation in pore water salinity at different tide levels in Chorao island

Fig. 5.7: Monthly variation in pore water pH at different tide levels in Chorao island

Fig. 5.8: Monthly variation in pore water DO at different tide levels in Chorao island

Fig. 5.9: Monthly variation in sediment Chl *a* at different tide levels in Chorao island

Fig. 5.10: Monthly variation in pore water nitrite at different tide levels in Chorao island

Fig. 5.11: Monthly variation in pore water nitrate at different tide levels in Chorao island

Fig. 5.12: Monthly variation in pore water phosphates at different tide levels in Chorao island

Fig. 6.1: Monthly variation in the Gonadosomatic Index (GSI) of male and female *P. erosa* at Chorao island

Fig. 6.2: Relative frequency of the maturity stages of *P. erosa* and monthly variation in estuarine water temperature

Fig. 6.3: Monthly variation in the Gonadosomatic Index of *P. erosa* (combined for both sexes)

Fig. 6.4: Monthly variation in gonad weight of *P. erosa*

Fig. 6.5: Monthly variation in dry weight (soft tissue) of *P. erosa*

Fig. 6.4: Monthly variation in the water content (soft tissue) of *P. erosa*

Fig. 6.7: Fecundity of *P. erosa* in relation to shell length

Fig. 6.8: Monthly mean oocyte diameter and number of *P. erosa*

Fig. 6.9: Size frequency distribution of *P. erosa* oocyte

Fig. 6.10: Variation in Chl *a* content of estuarine water and dry tissue wt. of *P. erosa*
Fig. 6.11: Relationship between GSI of *P. erosa* and Chl *a* content of the estuarine water

Fig. 6.12: Relationship between fecundity of *P. erosa* and Chl *a* content of the estuarine water

Fig. 6.13: Relationship between GSI of *P. erosa* and temperature of the estuarine water

Fig. 6.14: Relationship between GSI of *P. erosa* and salinity of the estuarine water

Fig. 7.1: Density of new settlers of *P. erosa* at Chorao island in different months

Fig. 7.2: Density of new settlers of *P. erosa* in different tidal levels at Chorao island

Fig. 7.3: Density of juvenile *P. erosa* at Chorao island in different months

Fig. 7.4: Density of juvenile *P. erosa* in different tidal levels at Chorao island

Fig. 7.5: Density of adult *P. erosa* at Chorao island in different months

Fig. 7.6: Density of adult *P. erosa* in different tide levels at Chorao island

Fig. 7.7: Density of new settlers, juveniles and adults of *P. erosa* at different tide levels

Fig. 8.1: Monthly variations in the biochemical composition of *P. erosa*

Fig. 8.2: Regression between proteins and shell length of *P. erosa*

Fig. 8.3: Regression between carbohydrates and shell length of *P. erosa*

Fig. 8.4: Regression between lipids and shell length of *P. erosa*

Fig. 8.5: Biochemical composition in different size classes of *P. erosa*

Fig. 8.6: Monthly variation in the Condition Index (CI) of *P. erosa*

Fig. 8.7: Relationship between lipid content of *P. erosa* and salinity of the estuarine water

Fig. 8.8: Relationship between lipid content of *P. erosa* and Chl *a* of the estuarine water

Fig. 8.9: Relationship between lipid content and Condition Index (CI) of *P. erosa*

Fig. 8.10: Monthly variation in the calorific content of *P. erosa*
LIST OF PLATES

Plate 2.1: View of Chorao island (study site) from the riverside
Plate 2.2: Exposed low-tide region at Chorao island with *Rhizophora* dominated mid-tide in the background
Plate 2.3: The high-tide region inside the *Avicennia* forest in the study area at Chorao island
Plate 2.4: a: Collection of adult clams in the field, b: plastic crate with *P. erosa*
Plate 2.5: Sediment collection and sieving for juveniles
Plate 2.6: Cages in the field experiment to study *P. erosa* settlement
Plate 3.1: Mangrove clam *P. erosa* in *Avicennia* roots
Plate 3.2: Shell valves of *P. erosa* (external and internal view)
Plate 3.3: *P. erosa* with heavily corroded umbo
Plate 3.4: *P. erosa* with extended inhalant and exhalant siphon
Plate 3.5: *P. erosa* with foot extended through pedal gape
Plate 3.6: Size variation in adult *P. erosa*
Plate 4.1: Phytoplankton species observed in the gut of *P. erosa*
Plate 6.1: The female and male *P. erosa* with mature gonads
Plate 6.2: Position of gonad in *P. erosa*
Plate 6.3: Maturity stages observed in female and male *P. erosa*
Plate 6.3.1Ca: Close view of ripe sperms in *P. erosa*
Plate 6.3.1Cb: Close view of ripe eggs in *P. erosa*
Plate 7.1: (a) New settler (b) Juvenile (c) Adult of *P. erosa*
Plate 7.2: Schematic representation of the recruitment in *P. erosa*
Plate 7.3: Post-larval stage of *P. erosa* found in the plankton samples
LIST OF TABLES

Table 2.1: Data on the climatological features (a) Temperature (b) Humidity (c) Rainfall for the sampling collection date with monthly average

Table 3.1: Location-wise details of morphometric measurements (range) of *P. erosa* population collected during the present study

Table 3.2: Results of ANOVA between months on (a) mean length and (b) size classes of *P. erosa* at Chorao island

Table 3.3: Morphometric relationship of shell dimensions with total weight and soft tissue weight of *P. erosa*

Table 3.4: Morphometric relationship of shell weight with total weight of female and male *P. erosa* during different seasons

Table 4.1: Phytoplankon species (nos./clam) in the gut of *P. erosa* from Chorao island

Table 4.2: Pearson’s product moment correlation coefficients between environmental variables at Chorao island and *P. erosa* growth (wet and dry tissue wt.) and Condition Index (CI)

Table 4.3: The coefficients of the linear combinations of the environmental variables making up the 2 principal components or the factors studied at Chorao island

Table 4.4: Eigen values for the Principal component analysis for the environmental variables studied at Chorao island

Table 4.5: Factor scores for the Principal Component analysis of the environmental variables studied at Chorao island

Table 4.6: Model from multiple linear regression analysis that best explain the variation in *P. erosa* growth (tissue dry wt.)

Table 4.7: Model from stepwise multiple linear regression analysis that best explain the variation in *P. erosa* growth (tissue dry wt.)

Table 4.8: Effect of temperature, salinity and air exposure on *P. erosa* under laboratory conditions
Table 5.1: Results of ANOVA among sites on clam (a) abundance, (b) biomass and (c) size classes at Chorao island

Table 5.2: The abundance and biomass of adult *P. erosa* at Chorao island

Table 5.3: Results of ANOVA for effects of tidal levels and months on the abundance of *P. erosa* at Chorao island

Table 5.4: Results of ANOVA for effects of tidal levels and months on the biomass of *P. erosa* at Chorao island

Table 5.5: The mean (±SD) values of different environmental parameters studied in different tide levels at Chorao island

Table 5.6: Results of ANOVA among tidal level on (a) temperature and (b) pH

Table 5.7: Models from multiple linear regression analysis that best explain variation in *P. erosa* abundance

Table 5.7: Models from multiple linear regression analysis that best explain variation in *P. erosa* biomass

Table 5.7: Models from stepwise multiple linear regression analysis that best explain variation in *P. erosa* abundance and biomass

Table 6.1: Oocyte diameter of *P. erosa* during July 2004- July 2005 from Chorao island

Table 7.1: Results of ANOVA between months on density of *P. erosa* (a) new settlers, (b) juveniles and (c) adults at Chorao island

Table 8.1: Relationship of shell length (TL) and biochemical components of *P. erosa*

Table 8.2: Results of ANOVA for effects of months and size classes on the biochemical composition of *P. erosa* from Chorao island

Table 8.3: Pearson’s correlation matrix for gross biochemical composition, dry tissue wt., Condition Index, Gonadosomatic Index of *P. erosa* and water Chl *a*, temperature and salinity
