I bow my head with great authenticity and extreme reverence to almighty God, who is the guiding light in every moment of my life.

It is my proud privilege to express a genuine sense of respect and gratitude to my esteemed supervisors Dr. Mohd. Ayub Ansari, Senior Lecturer, Department of Chemistry, Bipin Bihari College, Jhansi for his invaluable and profound guidance, befitting advisement, unremitting cooperation, debonair discussion, critical evaluation, consistent patience and help throughout the investigation and preparation of this manuscript.

I am immensely grateful to my Co-supervisor Dr. Dheer Singh, Professor and Head, Institute of Food Science and Technology and Dean, Institute of Engineering and Technology, Bundelkhand University for his valuable counsel, indelible cooperation, critical suggestions and encouragement and for opportune availability of facilities and materials during the pursuit of this study and preparation of this manuscript.

My heartfelt thanks are also due to staff members of Department of Food Science and Technology, Department of Chemistry and central laboratory,
Pantnagar for their benevolent and timely cooperation and supportive attitude during this University.

I am grateful and would like to convey the sentiments and indebtedness towards my family members for their boundless and unconditional love inspiration, dependency, faith, moral support and fulfillments of needs and desire. They are the sculptors of my beautiful life. I am deeply moved and obliged by the informal, trustworthy and constant companionship and love rendered by my nephew Master Vimal and little niece Vanshika.

I am also thankful to Sri K.K. Mishra for typing this thesis neatly and timely.

My sincere thanks are also due to all those who have helped me directly or indirectly during the course of this investigation.

Jhansi
