Acknowledgements

As I present my research findings, I express my gratitude to those who are involved in this learning process.

In the first place, I bow my head before God, who has “hidden these things from the wise and the learned and revealed them to mere children” [Bible, Mt 11:25].

I was privileged to be guided by Dr. Suma V., an eminent academician and visionary. Her constant support, guidance and encouragement helped me to achieve my aim in a time bound manner. I place on record my indebtedness to her.

I also thank Dr. Sandeep Shastri for assessing my progress and giving valuable suggestions.

I am grateful to Dr Chenraj Roychand, Chairman - Jain University, Karnataka - Bangalore, for providing a platform of education.

Thanks also to the other teaching and non-teaching staff as well as the research scholars of the department of Computer Sciences, Jain University, Karnataka Bangalore. Their presence and support had a role in the completion of this research.
