Acknowledgement

I am grateful to my guide, Dr. Baban Ingole for his keen interest, encouragement, constant guidance and patience with me; this has provided the foundation to my thesis.

My deep sense of gratitude to the former Director Dr. Ehlrich Desa and Dr. Satish Shetye, Director, NIO, for giving me an opportunity to do my Ph.D in NIO.

The current work was carried out under the project "Polymetallic nodule environmental impact assessment" under which I worked as a project assistant for the initial two and half years of my research, I am thankful to Ministry of Earth Sciences (Govt. of India) for the funding.

My gratitude to Council of Scientific and Industrial Research (CSIR) for awarding me the senior research fellow scholarship, which has supported me during my last one and half years of research.

I am very much grateful to Dr. Rahul Sharma for his valuable advice in scientific discussions and for his critical comments, which has given a better picture to my thesis.

I am thankful to Dr. G.N. Nayak, Head, Department of Marine Science, Goa University, for allowing me to register for Ph.D and for his encouragement and advices.

I owe a deep sense of appreciation and reverence to Dr. Jürgen Guerrero Kommritz from the Zoologisches Museum Hamburg, Germany, for his patient and selfless help in identifying the tanaids specimen and making me understand their taxonomic details. I am very much indebted to him.
I am grateful to, Dr. B. Nagender Nath for his indispensable help, and generosity for allowing me to use the organic carbon data, Dr. A.B. Valsangkar for providing me sediment texture data, Dr. Lata Raghukumar for LOM data, Dr. P.A. Lokabharati and Miss Anindita for giving me the required bacterial data. Also the general discussions with them have been very helpful for this study.

I acknowledge the help rendered by Karen Osborn from Monterey Bay Aquarium Research Institute, California (Graduate Researcher); Dr. Michael Raupach from Forschungsmuseum Alexander Koenig, Germany; Dr. Jorundur Svavarsson, University of Iceland (Professor of Marine Biology) and Dr. Saskia Brix from University of Hamburg for the identification of isopods and for providing the taxonomic literature and identification keys.

Literatures and advices related to the biomass estimation of the deep-sea macrofauna was provided by Lenaick Menot from Institut Océanographique, Paris (COMARGE Project Manager); Dr. Gilbert Rowe from Texas A&M University at Galveston, Texas; Brian Bett from National Oceanography Centre, Southampton; Dr. Paul Tyler from University of Southampton, UK, Dr. Michael Rex from University of Massachusetts, USA; Dr. Ingrid Kronke from Senckenberg Institute, Wilhelmshaven, Germany and Dr. Thomas Soltwedel from Alfred-Wegener-Institute for Polar and Marine Research, Germany (Deep-sea Biologist), my sincere gratitude to all of them.

I am thankful to Dr Richard Lampitt, National Oceanography Centre, Southampton, UK for the discussions via e-mail, which helped to provide a better understanding of the particle flux reaching the abyss.

My thanks are due to Dr. Graham Oliver from National Museum of Wales, Cathays Park; Dr. John Zardus from University of Massachusetts, USA; Dr. Tomoki Kase from National Science Museum, Tokyo; Dr. John Allen from
University Marine Biological Station Millport, UK (Emeritus Professor), for helping me with the bivalve identification.

I owe my gratitude to Late Dr. C.L. Rodrigues, Goa University; due to him I developed a keen interest in the marine life.

I acknowledge Reshma for all the help she rendered on board as well as in the four years of my Ph.D. in benthos lab, also for helping with the meiofaunal data.

Sandhya for her unconditional help and providing me moral and mental support and timely criticism, which has helped me to give a better angle for my thesis.

Mandar for his help in identification of nematodes and for his patience and support from the initial stages of my thesis.

Alba and Sanitha for their help in identification of polychaetes and for their patience in sitting with the samples and teaching me, and being there for me whenever I needed.

Vijay, Nisha, Sindhu, Murali, Ajay and Vineesh for their encouragement, love, support, untiring helping hands and bearing with me throughout the tenure of my Ph.D. I could not have asked for better comrades.

Sabhya and Rubail for their help whenever I needed. Sijin, Syam, Nuncio, Aboobacker, for their help in various things related to my Ph.D. and otherwise.

Shantanu, Mohammed, Joereen and Aneesh for their concern and timely help provided.
My thanks are also to Dhanya, Jayant, Vidya, Roshin, Balu and Nagaraju whose company has given me moments of relaxation in my hectic thesis schedule.

Kishan, Laju, Rajani, Janhavi, Sharon, Priya, Shamina, Pawan, Veronica, Manoj and Jane, who were there with me during the tenure of my Ph.D.

I am grateful to Sameer, Lekshmi, Sonali, Dinesh, Santan, Brenda, Siby, Areef, Rupali, Trupti, Rupali and Lokanath for the help rendered by them onboard Sidorenko and Boris Petrov.

I acknowledge Dr. Pedro Martin and the CEDAMAR group for their help in identification of harpacticoid copepods.

I acknowledge the help of Dr. Melanie Austen of the Plymouth Marine Laboratory and the DARWIN worldwide pollution-monitoring programme for providing the nematode identification key and PRIMER software.

Dr. T.C. Vidya from Institute of Science, Bangalore and an anonymous statistician from Minimax Consulting, LLC group for their timely help with statistics.

My thanks are due to Sahana and Gourish for their help related to SEADAS data. Mr. Jayshanker for his help with surfer and Mr. Chitari (DTP section) for his perfect drawings.

Dr. Shyam Prasad, for his kindness and eagerness in helping me with the literature related to nodules of the CIOB.

Ravi, Divya Sreedharan, Mr. Khedekar for helping me with the SEM photography procedures
Dr. Vijaykumar Rathod for his concern and help throughout my tenure in NIO.

Sushma, Lidita, Dattesh, Nagarajappa, Karmabeer, Rochelle, Vinod, Dhillan, Aditya, for their assistance whenever I required.

I am thankful to my adorable sister Mini for her guidance and encouragement and my loving sister Rini, for her jokes, tit-bit fights and affection, which has added life even at stressful moments. My little nephew Ankush, whose smiles and play makes me forget all my worries.

Anoop for his love, constant encouragement and support throughout and giving me the whole lot of happiness in my life and also for tolerating sometimes even my silliest behavior. He taught me the principle to see good in everything. Apart from this, he has made me knowledgeable in matters related to computers.

To my loving papa and mummy, who have laid the foundation of my life and rewarded me with their unconditional love and care. I am blessed to be gifted with such loving parents; I would have been nothing without them.

I am very thankful to the almighty for the strength, patience and all the goodness he has given me.
