</table>
2.2: Latitudinal gradients 22-24
2.3: Abundance of macrofauna 24-28
2.4: Vertical distribution of macrofauna 28-29
2.5 Fate of phytodetritus pulse at abyssal seafloor 29-31
2.6: Deep-sea experimental studies 31-36

CHAPTER III: MATERIALS AND METHODS
3.1: Study area 37
3.2: Sampling 38
3.3: Data Acquisition 38-39
3.4: Sampling Design and Processing 39
3.5: Biomass estimations 40
3.6: Bathymetry data 40
3.7: Chlorophyll-a 40
3.8: Organic Carbon estimation 41
3.9: Labile organic matter 41
3.10 Bacterial count 41
3.11: Sedimentological studies 42
3.12: Data Analysis 42-43

CHAPTER IV: RESULTS
4.1: Macrofaunal study during the March 2003 cruise
   4.1.1: Faunal composition and abundance 44-45
   4.1.2: Faunal biomass 45-46
4.1.3: Environmental parameters, meiofauna and bacteria 46-47

4.1.4: Structural analysis 47

4.1.5: Cluster analysis 47-48

4.1.6: Relationship between macrofaunal community indices and sediment environment parameters 48-49

4.1.7: Vertical distribution 49-51
   4.1.7.1: Density and Composition 49-50
   4.1.7.2: Biomass 50-51

4.2: Macrofaunal study during the April 2005 cruise

4.2.1: Faunal composition and abundance 52-54

4.2.2: Faunal biomass 54-55

4.2.3: Environmental parameters, meiofauna and bacteria 56

4.2.4: Structural analysis 55-56

4.2.5: Cluster analysis 56

4.1.6: Relationship between macrofaunal community indices and sedimentary environment parameters 56-58

4.2.7: Vertical distribution 58-59
   4.2.7.1: Density and composition 58-59
   4.2.7.2: Biomass 59

4.3: Macrofaunal community structure in the CIOB

4.3.1: Diversity of macrofauna in the CIOB 60-61

4.3.2: Parasites on deep-sea crustaceans 61-62

4.3.3: Distribution of macrofauna and org. C in the CIOB 62
4.3.4: Chlorophyll-α concentration in the CIOB

4.4: Temporal variation of macrofauna in the Central Indian Ocean

4.4.1: Abundance

4.4.2: Biomass

4.4.3: Vertical distribution

4.4.4: Variability in benthic standing stock and environmental parameters during the two cruises

4.4.5: Mann-Whitney and t-test

4.5: Sieve size influence on macrofauna

4.5.1: Influence of sieve size on the macrofaunal abundance

4.5.2: Diversity indices

4.5.3: Biomass

4.5.4: Vertical distribution

4.5.4.1: Density

4.5.4.2: Biomass

CHAPTER V: DISCUSSION

5.1: Macrofaunal community structure

5.1.1: Faunal composition and abundance

5.1.2: Macrobenthic biomass

5.1.3: Correlations

5.1.4: Vertical distribution of macrofauna

5.2: Temporal Variation

5.2.1: Temporal variability of macrofauna
5.2.2: Vertical distribution of macrofauna 90-91

5.3: Influence of sieve size on macrofauna 92-94

CHAPTER VI: CONCLUSION 95-98

BIBLIOGRAPHY 99-139
