Nomenclature		
CHAPTER 0:	INTRODUCTION	
0.1:	Simple Bénard problem	1
0.2:	Linear stability analysis	2
0.3:	Rayleigh's theory of simple Bénard convection	5
0.4:	Thermohaline (or thermosolutal) convection or double-diffusive phenomenon	10
0.5:	The fundamental mechanisms	11
0.6:	The fundamental works of Stern, Veronis, Banerjee and others	13
0.7:	Contributions of Part - I	18
0.8:	Contributions of Part - II	20
CHAPTER 1:	A PAIR OF SEMICIRCLE THEOREMS IN THERMOHALINE CONVECTION	
1.1:	Abstract	25
1.2:	Introduction	25
1.3:	Mathematical analysis	27

CHAPTER - 2:	A PAIR OF SEMICIRCLE THEOREMS IN ROTATORY THERMOHALINE CONVECTION	
2.1:	Abstract	39
2.2:	Introduction	39
2.3:	Mathematical analysis	42
CHAPTER - 3:	BASIS AND CONSTRUCTION OF MODIFIED SIMPLIFIED EQUATIONS GOVERNING THE WORK IN THE SUBSEQUENT CHAPTERS	
3.1:	Basis of the modified simplified governing equations	58
3.2:	Construction of the modified simplified governing equations	63
CHAPTER - 4:	MODIFIED ANALYSIS OF BÉNARD CONVECTION, GENERALIZED BÉNARD CONVECTION AND THERMOHALINE CONVECTION	
4.1:	The problem and the initial state	75
4.2:	The basic equations and the initial state solution	75
4.3:	The perturbation equations	76
4.4:	The normal mode analysis	77
4.5:	The boundary conditions	79
4.6:	The characteristic value problem	81
4.7:	Mathematical analysis	85
4.8:	Contribution of Chapter -4	110

CHAPTER - 5:	MODIFIED ANALYSIS OF BÉNARD CONVECTION, GENERALIZED BÉNARD CONVECTION AND THERMOHALINE CONVECTION: THE EFFECT OF ROTATION	
5.1:	The problem and the initial state	112
5.2:	The basic equations and the initial state solution	112
5.3:	The perturbation equations	113
5.4:	The perturbation equations governing the normal modes	114
5.5:	The boundary conditions	115
5.6:	The characteristic value problem	116
5.7:	Mathematical analysis	120
5.8:	Contributions of Chapter - 5	137
CHAPTER - 6:	MODIFIED ANALYSIS OF BÉNARD CONVECTION, GENERALIZED BÉNARD CONVECTION AND THERMOHALINE CONVECTION: THE EFFECT OF MAGNETIC FIELD	
6.1:	The problem and the initial state	139
6.2:	The basic equations and the initial state solution	139
6.3:	The perturbation equations	140
6.4:	The perturbation equations governing the normal modes	142
6.5:	The boundary conditions	143

6.6:	The characteristic value problem	144
6.7:	Mathematical analysis	149
6.8:	Contributions of Chapter -6	165
CHAPTER - 7:	MODIFIED ANALYSIS OF BÉNARD CONVECTION, GENERALIZED BÉNARD CONVECTION AND THERMOHALINE CONVECTION: THE EFFECT OF ROTATION AND MAGNETIC FIELD	
7.1:	The problem and the initial state	167
7.2:	The basic equations and the initial state solution	168
7.3:	The perturbation equations	168
7.4:	The perturbation equations governing the normal modes	170
7.5:	The boundary conditions	171
7.6:	The characteristic value problem	172
7.7:	Mathematical analysis	178
7.8:	Contributions of Chapter -7	187
