Chapter-1

Introduction 1-74

1) The selection of research problem 3

2) Description of variables involved 6
   a) Achievement Motivation 6
   b) Self-concept 29
   c) Mental Health 37

3) Objectives of the present study 50

4) Hypothesis 61

5) Importance of the Present Study 73

6) Delimitation 74

Chapter-2

Review of Related Researches 75-101

Chapter-3

Research Methods and Procedures 102-118

a) The Sample 102

b) Design and variables involved 103

c) The tools used 103

d) The collection of data 117

e) The statistical technique used 118

Chapter-4

The Data Analysis and Discussion 119-267

Part A Overall comparison of the Achievement motivation 120

of male and female/sport and non-sports students.

Part B Overall comparison of the Achievement motivation 123

as related to Mental Health of male and female/sport

and non-sport students
Part C Overall comparison of the Achievement motivation as related to Self-Concept of male and female/sport and non-sport students

Part D The effect of sex (male and female) and self-concept on achievement motivation

Part E The effect of types of students (sport and non-sport) and self-concept on achievement motivation

Part F The effect of sex (male and female) and mental health on achievement motivation

Part G The effect of types of students (sport and non-sport) and mental health on achievement motivation

Conclusion

Chapter 5

Summary

Bibliography

Appendix (a) Test Papers

i) Achievement Motivation Test (AMT)

ii) Self-Concept Scale

iii) Mental Health Scale (MHS)

b) Raw Scores (Data Sheet)
