## CONTENTS

**Synopsis:** l-XXI

### Chapter I General Introduction

- Introduction: 1
- Types of Drugs that Interact with DNA: 5
- Objectives of the Present Work: 31
- References: 34

### Chapter II Section A Design, Synthesis and DNA binding Affinity and *in vitro* Cytotoxicity of Pyrrolo[2,1-c][1,4]benzodiazepine-Chrysin hybrids

- Introduction: 42
- Present Work: 44
- DNA-Binding Affinity: 47
- Biological Activity: 49
- Spectral Data Discussion: 50
- Experimental: 54

### Chapter II Section B Design, Synthesis and Biological Evaluation of Novel Quinazolinone Linked Pyrrolo[2,1-c][1,4]benzodiazepine Hybrids

- Introduction: 64
- Present Work: 67
- Biological Activity: 70
- DNA-Binding Affinity: 71
- Spectral Data Discussion: 72
- Experimental: 78
Chapter II Section C Design, Synthesis and DNA Binding affinity of novel Pyrrolo[2,1-c][1,4]benzodiazepine Indolindione Hybrids

Introduction 94
Present Work 96
DNA Binding affinity 97
Spectral Data Discussion 99
Experimental 101
References 106

Chapter III Design, Synthesis and in vitro Cytotoxicity of novel Chrysin Conjugates

Introduction 109
Present Work 116
Biological Activity 120
Spectral Data Discussion 124
Experimental 132
References 147

Chapter IV NaI/AcOH: A Versatile Reagent System in Organic Synthesis

Introduction 150
Present Work 151
Experimental 164
References 187
