ACKNOWLEDGEMENTS

It is a moment of gratification and pride to look back with a deep sense of contentment and gratitude at the long travelled path, to be able to capture some of the finest moments, to be able to thank the infinite number of people, some who were with me from the beginning and some who joined me later, whose love and blessings have made this day possible for me.

At first, I would thank God for showering his blessings upon me and giving me strength to reach the final stage.

I wish to express my deep sense of gratitude and indebtedness towards my research guide Dr. Suresh D. Jagtap, Scientist E, Herbal Biotechnology Laboratory, IRSHA, for accepting me as his research student and imparting fearlessness and confidence in me. I had the will but the way to accomplish my goal was shown only and only by my esteemed research guide. Without him it would have been impossible for me to bring my dream into reality.

I would like to thank my Co-guide Prof. Mahabaleshwar V. Hegde, Director, CINHD, the best advisor and guide I could have wished for. During these years I have known him as a sympathetic and principle-centred person. His enthusiasm and integral view on research and his mission for providing 'only high-quality work and not less', has made a deep impression on me. I owe him lots of gratitude for having shown me this way of research; I have learned a lot from him. He taught me to look for solutions to problems rather than fret over the problem. He has always given me freedom to work and added new dimension to my scientific thinking.

A time to time encouragement and excellent guidance by Prof. Surendra S. Katyare, Emeritus Professor, CINHD, always kept me on the right track. His caring and parental attitude always enlightened the way during my research work. His keen interest and encouragement
served as a constant inspiration during the entire course of study, as he shared his vast experience so generously and patiently. He has been a great support and I can never thank him enough for what he has done for me.

I would like to acknowledge and express my thankfulness to our Vice Chancellor, Dr. S. S. Kadam and, The Director, IRSHA, for providing the necessary infrastructure and all the facilities required for carrying out my research work.

I also take this opportunity to sincerely acknowledge the Indian Council of Agricultural Research (ICAR), Government of India, New Delhi, for providing financial assistance in the form of Senior Research Fellowship which buttressed me to perform my work comfortably.

I take this opportunity to express my gratitude to Dr. Subhash Bodhankar and Dr. Abhay Harsulkar for providing their available facility at Poona college of Pharmacy (PCP) and their great support and motivation. I am grateful to Dr. Yun Tam, Scientist, Sino-Veda, Canada, and his enthusiastic staff, for their help in evaluating bioavailability of withanolides employing their patented Sino-Veda cell culture system. My special gratitude to the Dr. Prakash Ghorpade, Emeritus Scientist, CINHD, and Mr. Manohar Panse, Managing Director, RWNL Foundation, for their support during my investigations.

Special thanks to Late Prof. Ramanlal Kothari (Former, Principal, Rajiv Gandhi Information Technology Biotechnology) for his guidance and suggestions from time to time.

Words will be insufficient to express my deep sense of gratitude and grateful thanks to my Mummy and Papa for their love and affection, and Sacrifices. My parents feel very happy and proud that I have completed my work and reached this stage. Pujali, my dearest sister, the apple of my eye and piece of my soul, her affection and support were like mellifluous confluence of blessings of almighty. I
want to extend my deepest regards to my brother Prasad who has been a pillar of strength guiding and supporting me like pole star through difficult situations.

I dedicate my Thesis to everyone who made sure that my dream comes true, especially my wife Manasi for tolerating my longer periods of absence from family duties and for sharing pleasant moments during the concluding stages of the Thesis. I also thank her for her support in the tough phases of my life and taking care of all the household responsibility which gave me enough time and space to complete my work.

My in-laws (Aai and Baba) believed in me and my dream. They made sure that I achieve my goal by giving me moral support. I can see the true happiness in their eyes and I am truly grateful to them for their love, trust, patience and of course, for bearing all kind of stresses, they could, to make me what I am. I am obliged to my Parents and In-Laws but I would like to remain in their obligations because it gives warmth of their affection for me, which I wish to get throughout my life. I am thankful to my sisters-in-law Trupti and Ketaki for their great help and support which gave me courage and confidence.

My most precious daughter Rujul, a bundle of joy, enlightened the very fabric of my life with her innocence which helped me wade through sea of difficult moments. Along with her other younger members of my family Aaranya, Rutvii and Aarya always kept me fresh and energetic.

I am thankful to my entire team members Dr. Surekha Bhalerao, Mrs. Asawari Joshi, Dr. Shripad Atkare, Dr. Chetna Bhatt, Dr. Deepak Kasote, Dr. Tejas Gosavi, Sankeet Suryapujari, Aniket Mali, Sunita Bhise, Sheetal Phalke and Swapnil Karpe who have helped me to accomplish this onerous task. It would be failing in my duty if I did not express my thankfulness to Neha Khot and Devyani Kukade for their help. Words are inadequate enough to put across my feelings for my colleagues, especially Soumya Koppikar, Pallavi Nirmal, Aarti
Narkhede, Bhagyashri Nagarkar and Sheetal Girimkar for their valuable help and support.

My special thanks to Dr. Anand Zanwar, Yogesh Bahde and Amit Kandhare for bearing with me in my most difficult times. Their constant love, affection, support and faith in me played a key role in accomplishing this project.

It is my pleasure to thank to Ashjad, Shivkumar, Mithun, Rajmane, Javed, Pooja and Akansha, Department of Pharmacology, Poona college of Pharmacy whose help made this thesis possible. I am also thankful to all my friends for reliving my tensions and helping me in some way or the other to accomplish my task.

My sagacious thanks are also due to Dr. Manasi Deshpande, Professor and Head, Department of Ayurvedic Materia Medica, Ayurveda College, Bharati Vidyapeeth Deemed University, Pune.

I would like to express my thanks to Vijay Gavade, Umesh Patil, Nayan Maharnawar, Nitin Mote, Tushar Shinde and all other Staff members of IRSHA and RWNLF, who continued to support my aspiration with lots of love and encouragement.

I will remain indebted forever to the lives of the animals sacrificed during the experiment, which was done with the noble purpose of widening the horizons of Science.

Beside this there are several others who have knowingly or unknowingly helped me in the successful completion of this project. I thank all the people for every ounce of efforts they contributed.

Santosh Tatyaba Devkar
