Acknowledgements

To begin with, I bow with greatest gratitude to the cosmic energy which supported me to prevail through the ups and downs of this ‘karma’ called PhD and opened avenues that helped me to unlearn identification with ego and its various manifestations.

I would also like to offer my sincere thanks to all undergraduate medical students of Kasturba Medical College, Manipal, who willingly participated in this study, despite their busy schedule.

I am deeply grateful to my Guide, Dr. Latha K.S., for her valuable guidance and friendly support throughout this endeavour. She has been besides me in times of self-doubts and silently motivated me.

I am thankful to Dr. B. Rajashekar, Dean, SOAHS and Dr. G.K. Prabhu, Registrar, Manipal University, for sanctioning leave without which this study would have not reached completion.

I am also thankful to Dr. Shripathy M. Bhat, DAC member and Professor of Psychiatry, K.M.C., Manipal for his valuable suggestions and guidance.

I express my sincere gratitude to Dr. Asha Kamath, Associate Professor, Dept. of Community Medicine, K.M.C., Manipal, a great teacher, who spent lot of time in patiently teaching me both essential and advanced statistics. She not only helped me to overcome my fear and avoidance of numbers, but also instilled in me curiosity to learn more about statistics.

I extend my gratitude to Dr. Immanuel Thomas, Professor, Department of Psychology, Kerala, and Dr. Derek D. Rucker, Professor of Marketing, Kellogg School of Management, Northwestern University, US, for helping me resolve certain doubts related to analyses.

I offer my sincere thanks to Dr. Dinesh N, my teacher and colleague for his invaluable timely suggestions, especially during the final phase of the thesis completion.
Acknowledgment

I thank Dr. Johnson Alex, my colleague for his support, specifically during the completion period of this thesis.

I offer my thanks to Dr. G. Arun Maiyya, Professor of Physiotherapy and Chairperson, Research Committee, SOAHS for his support and valuable suggestions.

I convey my gratitude to all those faculty of Kasturba Medical College who helped me to recruit students to the study.

I am also thankful to staff and students of Psychiatry and past students of Clinical Psychology for their general concern and specific help in recruiting students to this study and scrutinizing my tools.

Lastly, my sincere gratitude to my friends Dr. Uday Pai, and Dr. Venkataraya Bhandary, Sudha sister, Pramila sister, and Pushpa sister for supporting and advising me in times of need during this study period.
