Words are few when heart is full with lot of feelings. Though I had to delve deep in to the ocean of vocabulary and ransack that racks of expression, I am excited that I would find a few words placed in sequence to express what I feel.

First of all my heartful salutation to the feet of Almighty of Holy spirit God bestowed upon me the strength and zeal as a result of which this task has been completed.

I have no words to express my heartfelt gratitude to my respected parents Late Surendra Narayan Thakur and Late Lakshmi Thakur without whom I would never have been able to reach this far.

I avail this opportunity to express my profound thanks and deep respect to my Advisor Prof. (Dr.) Ramesh Chandra, Dean and Head, Department of Dairy Technology, Warner School of Food and Dairy Technology for his affection, constant encouragement and valuable suggestions during the time of investigation. He has not only been fathomless ocean of knowledge and wisdom to me but most of all, his handful of blessings has been my pillar of strength and courage to go on in the most bitter of circumstances in my head bows before none but at his and my eyes dampen as words of thanks pen on this paper. My future may not give anything more; it has given me the opportunity to study under this great Scientist.

I avail this opportunity to extend my heartfelt thanks and deep respect to golden hearted Prof. (Dr.) R. Khare, Professor, Department of Mathematics, as my SAC member for his affection, encouragement and able guidance during the course of this study.

I avail this opportunity to extend my heartfelt thanks and deep respect to golden hearted Dr. S. G. M Prasad, Associate Professor, Department of Dairy Engineering, Warner School of Food and Dairy Technology as my SAC member for his affection, encouragement and able guidance during the course of this study.
I avail this opportunity to extend my heartfelt thanks and deep respect to golden hearted Dr. (Mrs.) Sangeeta Shukla, Assistant Professor, Department of Dairy Microbiology, Warner School of Food and Dairy Technology as my SAC member for her affection, encouragement and able guidance during the course of this study.

I would also like to express my heartfelt indebtedness to Dr. D.K. Thompkinson, Dr. Arif A. Broadway, Dr. John David and other faculty members of the Warner School of Food and Dairy Technology, SHIATS, Allahabad, for their co-operation and immense help during the course of my study.

I think words would not be enough to depict on this paper, my feelings about my respected Bhaiya Shri Sachchida Nand Thakur and Bhabhi Smt. Anita Thakur for their love, blessing, continuous encouragement and inspiration which helped a lot to groom my personality to face the world boldly. They are the pillar of strength and inspiration which make me to strive for bright future.

I am overwhelmed with rejoic e to avail this golden opportunity to evince my profound sense of indebtedness to my beloved wife Mrs. Seema Thakur and my son Master Saksham Anand for their sacrifices, prayers, love and continued motivation and exhilaration rendered to me throughout the period of my higher studies, particularly at the cost of conveniences sacrificed, without which this achievement would not have become a reality.

I am very much thankful to non-teaching staff members Mr. Biju and Lab Assistants, Mr. Patras Masih and Mr. Hardeo Ram for their help during my thesis work.

I am in dearth of words to express my respect, love and gratitude towards my friends All Classmates, whose unparallel love, affection and encouragement helped me to reach this stage.

Most of all, I thank God for everything.

(Sahja Nand Thakur)
