## INDEX

1. Theory of Optical Polarization
   1.1 Introduction 1
   1.2 Optical Activity 9
   1.3 Rotating Polarizer 11
   1.4 Theory of Rotating Polarizer 13
   1.5 Optics of Liquid Crystals 15
   1.6 Application to Polarized Light Studies to Liquid Crystals 19

2. Liquid crystals
   2.1 Introduction to liquid crystal phases 20
   2.2 Ferroelectric Liquid crystals. 24
   2.3 Anti Ferro electric Liquid crystals 25
   2.4 Banana shaped liquid crystals 26
   2.5 Calculation of the director pattern in LC 30

3. Electro Optical Methods
   3.1 Introduction 32
   3.2 Optical Birefringence 33
   3.3 Tunable Opto electric studies 38
   3.4 Phase transition studies in LC’s 39
   3.5 Optical switching 41

4. Instrumentation and Calibration
   4.1 Instrumentation 43
   4.2 Laser source 44
   4.3 Polarizer identification 52
   4.4 Power supply unit 52
5. Results and Discussions

5.1 Calibration 65
5.2 Determination of phase transitions 70
5.3 Conclusions I 127
5.4 Study of Electro-Optic Properties of Liquid Crystals 128
5.5 Tunable Optical Polarization & Birefringence 132
5.6 Conclusions II 139
5.7. Optical Modulation 144
5.8 Conclusions III 144
