CHAPTER-1 INTRODUCTION

1.1 General 1
1.2 Solid waste management in developing countries 2
1.3 Present study 6
1.4 Objectives of the study 7
1.5 Limitations of the study 7

CHAPTER -2 Literature Review 8 - 45

CHAPTER - 3 Theory of statistical models and case study city data.

3.1 General 46
3.2 Double Exponential Smoothing model theory 46
3.3 Double Moving Average model theory 51
3.4 Case study city (GVMC) data of solid waste management 54
3.4.1 General 54
3.4.2 Data of solid waste management of case study city (GVMC) 54

CHAPTER- 4 Results and discussions

4.1 General 60
4.2 Solid waste generation rates in zones 1 to 6 of case study city (GVMC) 62
4.2.1 Solid waste generation rates for the period 2007 to 2011 62
4.2.2 Forecasting of solid waste generation rates for the period 2012 to 2016

4.2.3 Typical example of forecasting solid waste quantity using DES statistical model

4.3 Solid waste generation (SWG) rates for the case study city (GVMC) as a whole (but not as zonal wise)

4.3.1 Solid waste quantity (tons/day) during the years 2007 to 2011 and forecasted values for the years 2012 to 2016.

4.3.2 Solid waste generation rates of different components of solid waste in GVMC

4.4 Finances forecasting for solid waste management in the case study city of (GVMC) for the period 2012 to 2016

4.4.1 General

4.4.2 Per capita rate of expenditure on solid waste management during the year 2007 to 2011

4.4.3 Forecasted per capita rate of expenditure on solid waste management during the year 2012 to 2016.

4.4.4 Typical calculations of forecasting finance for solid waste management in GVMC “Double Exponential Smoothing” (DES) statistical model.
