ACKNOWLEDGEMENTS

It is my most pleasant duty to place on record my sincere gratitude and heartiest thanks to my honourable teacher Prof. K.C. Malhotra, F.R.I.C., F.N.A.Sc., Head of the Chemistry Department, Himachal Pradesh University, Shimla (India), whose gifted guidance, abundant interest, dynamic and creative advice have been helpful in the accomplishment of this project work. It is in fact my luck to have a guide of great eminence, high calibre and rare merits.

I am doubly indebted to Prof. K.C. Malhotra, Head of the Chemistry Department for providing me the necessary research facilities and fruitful suggestions.

I am highly thankful to Head of the Chemistry Department Punjab University, Chandigarh and Prof. Gurdev Singh for providing me the necessary facilities for IR and T.G.A. studies.

I fail to find words to express my sincere indebtedness to my late father Prof. Balwant Singh whose entire life was dedicated to the cause of education. His ceaseless inspiration, timely guidance, ever fresh encouragement and everlasting affection have enabled me to undertake and do justice to this gigantic and scholarly assignment. I bow my head before his saintly figure.
I pay my sincere and heartiest thanks to my mother sisters and brother for being the constant source of encouragement for attaining higher education.

I would like to express my thanks to Dr. S.C. Chaudhry and my laboratory mates for their immediate help and timely cooperation.

Lastly, I owe much to my husband and my sister Jagmohan Kaur for their keen interest, fruitful suggestions and sincere help to this scholarly approach being science students.

The financial assistance in the form of research fellowship provided by C.S.I.R., is also gratefully acknowledged.

(Anandjeet Kaur)
