ACKNOWLEDGEMENTS

I thank God Almighty, for he has given me the privilege and opportunity to present this compilation of mine. I extend my deep sense of thanksgiving to him for his blessings have always been with me in all the struggles and achievements of my life.

My first, and most earnest, acknowledgment must go to my research guide Dr. Pratima Tatke. In every sense, none of this work would have been possible without her guidance. She has been instrumental in ensuring my academic, professional, and moral well being throughout my study. She has endowed in my mind the qualities of hard work, sincerity and dedication. The success which I have achieved till now is because of her guidance. It is her constant help, unflinching guidance, critical views, helpful suggestions and constructive criticism that has helped in completing my research work successfully.

I was fortunate enough to receive the guidance of Dr. Ashok B. Vaidya, Research Director, ICMR Advanced Centre of Reverse Pharmacology in Traditional Medicine, Kasturba, Health Society, Mumbai, as Co-guide of our project work. His selfless perseverance and attention to my work consistently found pearls among heaps of our experimental data. He always threw enough research questions my way to help me gain deep insight into my work.

Both my mentors have been my source of inspiration when I see them working for hour’s together, without a ray of weariness on their faces, always ready to help students who are eager to gain knowledge from them. They always gave me great advice and a welcome diversity of perspectives. They have not only taught little minds like me, the way to research but also the virtues and values of life.

During my studies, I was fortunate to be granted a fellowship, and few awards which would have never been without the blessings of my mentors.

I am immensely thankful to Prof. M.C. Verhaar, and Dr. Joost Fledderus Department of Nephrology and Hypertension at Utrecht University Medical Centre, Utrecht; Netherlands, Europe. Without their valuable guidance it would
have been impossible for me to carry out the project work in a field of study that was altogether new for me. I would like to thank Dr. Joost, for his confidence in me, as well as for his rock steady guidance. It would be no exaggeration to say that this study would not have been completed today without his encouragement and support. I am indebted to Hendrik Gremmels and Pradeep Sherkhane for their help during my time at UMC, Utrecht and their support through every step of the way. I particularly thank Hendrik, who patiently gave me his time in all of my studies and helped me with his thoughtful and detailed feedback.

My thanksgiving note would be incomplete if I would not thank Dr. G. S. Talele, Principal, Brahma Valley College of Pharmacy, Nasik. He has always been the light of my path, has always encouraged and inspired me in my endeavors. Words can never encompass his importance in my achievements.

I am extremely thankful to Dr. S. Y. Gabhe (former Principal, C. U. Shah College of Pharmacy) for his motivation throughout my work. I am also thankful to Dr. K. K. Singh, Principal, C. U. Shah College of Pharmacy for providing the necessary facilities to carry out research work in the institute.

I extend a special thanks to the entire non-teaching staff members especially Mr. Kanti, Mr. Hasmukh, and Mr. Jayesh for their kind help and co-operation.

I would also like to thank Dr. Vinayak Naik, Piramal Life Sciences, Mumbai, for his great help in plant collection and pharmacognostical studies. He has always selflessly helped me in spite of his busy schedule and work pressures. I also thank Dr. Chaya Godse and Priyanka from Kasturba Kasturba, Health Society, Mumbai, for always helping me in every possible way.

This compilation of mine would have never been existed if I were not fortunate enough to receive the support of my parents, Mr. Sohan M. Jaiswal and Mrs. Lata S. Jaiswal. They are the source of my inspiration, and their image is the substance of my identity. Whatever I am the success which I have achieved and this Doctorate Degree which will be entitled to my name would have never been without their motivation in the crucial moments in my life. I thank the Almighty for he has
given me such great parents, who have molded my life with the principles of sincerity, hard work, and dedication. I wish to thank my dear brothers Kamlesh and Jitesh who have always endured and appreciated my work. My achievements and this pre-occupation of mine is the result of the arduous efforts they have taken for me and my education. I would express a deep sense of gratitude to my dear Grandparents who encouraged me in my endeavors and blessed me with their precious blessings. They have given my thoughts the wings to fly high.

My dearest friends Raksh, Rahul, Farooq, Navleen, Medha, Sampada, Satish, Manoj, Sanjay and their support has given me the strength to deal the obstacles in my life. It is the love, faith and care of these dear friends of mine, that has strengthened me in this work of mine. It is they who have never let me down even in the hardships of my life and have always reminded me of my goals.

I owe, a special thanks to Nidhiya for teaching me experimental techniques in pharmacology experiments and her ideas and our conversations. None of this could have happened without her help and support. I would never forget the times; we shared together, moments of disappointments and happiness working together on the project.

Many friends have helped me with the numerous tasks involved in this project. I can hardly name them all, but I must mention Aparna, Shalaka, Supriya, Deepu, Usha, Sonal Singh, Latisha, Kjirn, Sonal Desai, Shyamal, Meenal, Anjali, Darshana, Radhika Raheja, Tabassum Khan, Shilpa, Sarita, Deepali, Manju and Rachna Punjabi.

Sustaining the numerous efforts this study implied would have been impossible without the guarantee of being appreciated at home and by all my near and dear ones.

-------- Yogini S. Jaiswal
