First and foremost, all praise be to Almighty Allah, the most beneficent and the most merciful, who bestowed upon me the courage, patience and strength to embark upon this work and carry it to its completion successfully.

Next, I have to acknowledge with sincere thanks those persons whom I have met due to my good fortune. First of all, I am irrevocably indebted to the great man and supervisor Prof. Mursaleen, Department of Mathematics, Aligarh Muslim University, for his wonderful guidance, boundless support and incessant help which have inculcated in me the interest and motivation to undertake the research in this field. It has been only the providential that has enabled me to get a lifetime opportunity to work under his scholarly supervision.

Also, I am immensely thankful to Prof. Afzal Beg, Chairman, Department of Mathematics, Aligarh Muslim University, for providing the necessary facilities and creating the congenial atmosphere for research.

Further, I cannot hide my sensitive love and cordial thanks to my parents, brother and sisters, the ones who can never ever be thanked enough, for their financial and moral support and encouragement throughout my life. Also, I am highly grateful to my father-in-law Mr. K. A. Naji for his generous help. Above all, a special word of thanks from my heartstrings goes to my beloved wife Mrs. H. K. A. Naji who has accompanied and struggled with me, hand by hand, throughout the last four years of my study in India. For me, it is she who has made all things possible and converted my dreams into reality.

The only love that cannot be portrayed is that of my naughty children, the beats of my heart, whose innocent smiles have been standing behind my success.

Moreover, I am extremely beholden to my friends, colleagues, seniors and juniors for their direct or indirect cooperation.

Last but not least, I would like to express my deep sense of gratitude to our venerable institution, Aligarh Muslim University, Aligarh, and the University Grants Commission, New Delhi, for providing me with the Junior Research Fellowship during this research project.

(Abdullah Kaid Ali Noman)
