ACKNOWLEDGEMENT

Though words are often inadequate to express the feelings of heart, one must acknowledge the genuine help and support received from others during the fulfillment of a particular task. I would, therefore, like to convey my thanks to all those who contributed directly or indirectly in the completion of my research project.

I owe my immeasurable debt to Prof. Rajkumar, IMSAR, MDU, Rohtak, for always been extremely benignant and ungrudging in giving me forbidden access to his acumen in this field.

It gives me immense pleasure to express my heart-felt gratitude to him for the propelling and persuasive guidance, painstaking and untiring involvement with every line in the study. He has been fertile in suggestions, ruthless in criticism and vigilant in the detection and rectification of errors. He has left on me indelible impression through kindness, generosity, nobility and guiding wisdom.

In fact, words fail to ventilate my feelings for Dr. Raj Kumar.

I would like to express my gratitude to Prof. H.J. Ghosh Roy, Head, IMSAR and Dr. Neeraj Kaushik, TITS, Bhiwani who encouraged me every time during my working period on this project.

I also express my deep sense of gratitude to my parents and my parents-in-law, whose consecutive efforts rocked me from cradle to the glorious path of academics. I shall never forget their helpful attitude. I express my heartily regards to my family members for their support and blessings.

I am equally thankful to my spouse Mr. Amit Rathee, Application manager, ST Microelectronics, Greater Noida who inspired me all-time, and helped me a lot during this research work despite very busy with his occupation. Without his sincere and attentive efforts it wouldn’t have been possible for me to complete the schema into thesis.
I also wish to express my sincere thanks to my loving child Arnav who missed all my attention during my busy schedule. Vikram (my loving brother) also deserves for special thanks for providing his best efforts despite of job pressure.

I am also indebted to the respondents of the study who spared their valuable time and provided all the necessary information required for the research work, without their help work couldn't have been accomplished.

I am especially thankful to the staff members of the University Library for their full co-operation in making books and journals available for the present study.
