Contents

1. Introductory Account 01-14
   1.1 Preface 01-02
   1.2 Acknowledgement 03-04
   1.3 Introduction 05-14
      1.3.1 Historical Background 05-07
      1.3.2 Natural Products 07-09
      1.3.3 Computer Aided Drug Designing 09-10
      1.3.4 The Plant Dipteris wallichii 10-12
      1.3.5 North East India: Geographical Description 13-14

2. Review of Literature 15-31
   2.1 Early History of Pteridophytes 15-17
   2.2 Phytochemical Investigation of Pteridophytes 17-21
      2.2.1 Alkaloids in Pteridophytes 18
      2.2.2 Terpenoids in Pteridophytes 19-20
      2.2.3 Flavonoids in Pteridophytes 20
      2.2.4 Glycosides in Pteridophytes 20-21
   2.3 Biological and Pharmacological activities of Phytochemicals of Pteridophytes 21-30
      2.3.1 Antimicrobial activity of Pteridophytes 21-24
      2.3.2 Antulcer activity of Pteridophytes 24
      2.3.3 Analgesic activity of Pteridophytes 24-25
      2.3.4 Anti-inflammatory and antinociceptive activity of Pteridophytes 25-26
      2.3.5 Antioxidant activity of Pteridophytes 26-28
      2.3.6 Cytotoxicity of Pteridophytes 28-29
      2.3.7 Hepatoprotective activity of Pteridophytes 29-30
   2.4 Ethnopharmacological Investigation of genus Dipteris 30-31
3. **Materials and Methods**

3.1 Evaluation of antibacterial activity

3.1.1 The Present Scenario

3.1.2 Methodology adopted for screening of antibacterial activity

3.2 Phytochemical Screening

3.3 TLC Profiling

3.4 Column Chromatographic separation

3.5 Structure elucidation of isolated compounds

3.5.1 NMR Spectroscopic analysis

3.5.2 FT-IR Spectroscopic analysis

3.5.3 Mass Spectroscopic analysis

3.5.4 Structural elucidation

3.6 *In silico* screening of Therapeutic activity

3.6.1 Three dimensional structure generation of isolated compounds

3.6.2 Molecular file format conversion

3.6.3 ADME/Tox screening of isolated compounds

3.6.4 Identification of probable drug target

3.6.5 Study of binding efficacy of isolated compounds and target

3.6.6 Comparing binding efficacy with known inhibitors of the target

4. **Results**

4.1 Result of antibacterial activity

4.2 Result of Phytochemical Screening

4.3 Result of TLC profiling of different extracts

4.4 Result of Column Chromatographic separation

4.5 Structure elucidation of the isolated compounds

4.6 Result of ADME/Tox study

4.7 Result of Probable Drug Target identification
4.8 Result of screening of binding efficacy of isolated compounds and target  
4.9 Result of study comparative binding efficacy of existing inhibitors and target

5. Discussion 82-86

6. Conclusion 87

7. References 88-103

8. Appendix-I: Preparation of Reagents i

9. Appendix-II: Databases, Software and Servers used ii

10. Appendix-III: List of related Publications iii
