List of Tables

Table I - Details of psychoactive plants (Shulka & Jain 1997)
Table II - Potential psychoactive plants of Amravati region
Table III - Ethnobotanical information: informant's know-how
Table IV - Behaviour of powdered drug with different chemical reagents
Table V - Fluorescence characters of powdered drug under U. V. light
Table VI - Phytochemical tests
Table VII - TLC of crude drug
Table VIII - Acetylcholinesterase activity of brain of fish Labeo rohita

List of Figures

Fig. 1-10 - Successive solvent extraction of dried powdered drug
Fig. 11-19 - Dose mortality curves
Fig. 20 - Biophytum sensitivum: Macro and microscopical characters of leaf
Fig. 21 - Microscopical character of the stem and bark of Buchanania lanzan
Fig. 22 - Butea surperba: Macro and microscopic characters of leaf
Fig. 23 - Caesalpinia decapetala: Macro and microscopical characters of leaf
Fig. 24 - Microscopical characters of the root and root bark of Capparis zeylanica
Fig. 25 - Cuscuta chinensis: Macro and microscopical characters of stem
Fig. 26 - Desmodium polycarpum: Macro and microscopical characters of leaf
Fig. 27 - Dioscorea hispida: Macro and microscopical characters of Tuber
Fig. 28 - Thevetia peruviana: Macro and microscopical characters of leaf
Fig. 29 - Vigna trilobata: Macro and microscopical characters of leaf
