ACKNOWLEDGEMENTS

My first and foremost acknowledgment must go to Almighty God who has put me to all tests in these years of my Ph.D and gave me the mental strength to wade through this period with courage. Thanks to Allah (swt) for being with me always.

Real life isn't always going to be perfect or go our way, but the acknowledgement of what is working in our lives can help us not only to survive but surmount our difficulties. The process of Ph.D is a long journey during which you come across so many people who walk with you or support you to go through this period. By this part of my thesis, it is my turn to show gratitude to all those who have stood by me in the successful completion of this work.

This was perhaps the most enjoyable and thoughtful moment to acknowledge those who made significant contributions in completing my Ph.D. Finally the day has come to look around and think about the people who were source of support and inspiration for me. I was deeply sentimental in writing this section of my thesis.

My first, and most earnest, acknowledgment must go to my guide and my mentor Prof. Jamal Mohammed Arif, Ex-Head, Departments of Biotechnology, Microbiology and Bioinformatics, Integral University, Lucknow. I would like to thank him, for having led me into a fascinating area of Cancer Biology and Cancer Chemoprevention research, for his uncanny ability to tell a good and motivating story and for teaching me that anything that does not kill you, makes you stronger. I appreciate all his contributions of time, ideas and recommendations of funding to make my Ph.D. experience productive and stimulating. The joy and enthusiasm he
has for research was contagious and motivational for me, even during tough times during my Ph.D. I am greatly indebted to him for helping me to overcome obstacles in the process of conducting the research. In every sense, none of this work would have been possible without him. I have been fortunate as I have gained much more out of this association than I had ever anticipated. Thank you Sir for everything...........Shabina Mam will always be remembered for all the warmth that she holds cute Kashif & silent Yusuf for their brilliant shots in cricket and sober Arjumand for her caring attitude. I will always cherish the memories of the parties with sir’s and his family.................

My sincere thanks are also to Dr. Khalid A.El Sayed, Associate Professor, Department of Basic Pharmaceutical Sciences, College of Pharmacy, University of Lousiana at Monroe, Monroe, U.S.A. for his detailed and constructive comments, and for his important support specially to send me the costly marine derived dibromotyrosine leads to perform my Phd work. His ideas and concepts have had a remarkable influence on my entire career in the field of Biotechnology, Pharmacy and Bioinformatics. His extensive discussions, constructive criticism around my work and interesting explorations in text with the results have been very helpful in this study. I would also like to thank Ms. Asmaa A.Sallam, Research Scholar, Department of Basic Pharmaceutical Sciences, College of Pharmacy, University of Louisiana at Monroe, Monroe, U.S.A. for lending me all the necessary help and guidance as and when required.
With deep sense of gratitude, I owe sincere thanks to Prof. Rajendra Prasad who was actively involved in my work. I thank him for providing me guidance and space to work in his lab at School of Life Sciences (SLS), JNU. With a person with his experiences and foresightedness, I was made to learn and grow as a researcher. In spite of being such a big scientist, he is so caring, thoughtful, and hassle free. Whatever I have learnt in this lab 101 is all his contributions. I shall ever be grateful to him for all the things he did for me and sometimes even going out of the way to gain the maximum in this span of four years. It has been great experience to be a part of his team of 101. His optimistic attitude made me work more in spite of all the odds. It was wonderful to be working with you sir. Thanks a lot Sir for everything……I would also like to specially thank and appreciate the untiring help, guidance and support extended to me by Dr.Khyati Kapoor, Indresh Kumar Maurya and Dr.Tariq Bhatt in performing the crucial experiments of my PhD during my stay at 101 and Cancer Biology Laboratory, SLS, JNU. Without them I would have not being able to complete my experiments in one go which was a necessary requirement due to scarcity of source drug leads.

Besides this, I would like to thank Dr.Rana Pratap Singh, Dean, School of Life Sciences, Gujrat Central University, Gujrat for offering me to work as a visiting research fellow in his Cancer Biology Laboratory at JNU, New Delhi and Prof. (Dr.) M.K.J.Siddiqui, Director and Secretary, Council for Science and Technology, Government of Uttar Pradesh for giving me untiring help during my difficult moments. Their kind support and guidance have been of great value in this study. I
am also extremely thankful to Dr. N.S. Rao, his PhD student Raja Sudhakar D, School of Computational Biology and Bioinformatics, Jawaharlal Nehru University, New Delhi, Dr. Iqbal Ahmad, Associate Professor, Department of Agriculture Microbiology, Aligarh Muslim University, Aligarh, his PhD student Fohad and Dr. A.B. Pant, Scientist, I.I.T.R., Lucknow for helping me out to perform some of my valuable Ph.D experiments under their able guidance and supervision. A special mention must go to Dr. Afaque Mahmood, Head, C.C.G&D, Integral University, Lucknow and Dr. Iqbal Ahmad, Dy. Director (I.I.T.R.) Lucknow for their constant help and support.

I wish to express my warm and sincere thanks to Prof. S.W. Akhtar, Vice-Chancellor, Integral University, Lucknow for his kind cooperation, loving support and allowing me to avail the essential infrastructure and library facilities in the university and granting special leave to me for using the advanced instrumentation facilities at Jawaharlal Nehru University, New Delhi. The dynamic personality and visionary thinking of our Hon’ble Vice Chancellor is truly a motivation in totality in all my future endeavours. I also express my sincere thanks to the Chief Academic Consultant Prof. S.M. Iqbal and Pro-Vice Chancellor Prof. T.A. Usmani for continuous motivation and help in all attributes of research and academic work.

My warm regards also go to Dr. I.A. Khan, Registrar, Integral University, Controller of Examination and Dean (Faculty of Applied Science) Dr. Qazi Shoaib Ahmad, and Dy. Registrar (Academic & Admissions) and Academic Coordinator, Mr. Ghufran Ahmad and Mr. Yusuf Kidwai, Office Superintendent for all the help
and administrative support they have provided to me during my entire research work. I must not hesitate to say that Ghufran sir was always there to help me out in all the favorable or un-favorable situations I was in, duly supported by Yusuf sir. Both of them deserved to be mentioned, acknowledged and thanked specially. Mr. Sufian Abbasi, Procurement Officer is also thanked for all his help and endless support especially regarding the purchase of chemicals and instruments.

I am greatly indebted to the present Head of Department of Biotechnology Professor (Dr.) A.K. Srivastava for providing me excellent facilities. Special thanks goes to University Grants Commission for awarding me with Maulana Azad National Fellowship and Council for Science and Technology, Government of Uttar Pradesh for Young Scientist Visiting Fellowship and other monetary assistance in the form of travel grant and contingency, which made it possible for me to carry out this work.

I am extremely grateful to entire “Family of Teaching and Technical Staff” of the Department of Biotechnology, Microbiology, Biochemistry and Bioinformatics, Integral University, Lucknow. My vocab falls short to express my sense of gratitude and indebtedness for their care, love, support and motivation that they had given to me continuously during my entire tenure of research. I would also like to thank the past teaching and technical staff, who assisted me with their unsung efforts and timely support in carrying out various tasks important for laboratory maintenance and assistance.
Far too many people to mention individually who assisted me in several ways during my work at JNU. These include my seniors, colleagues and my juniors and my sincere thanks to all of them. Few people would need a special mention. I wish to thank Dr. Kavinder Kumar Kesari who taught me basics of the research techniques used in my research. The memories of nights spent at Ganga Dhaba along with a cup of tea will always be cherished. Many a times his cool attitude helped me to come out of tough situations. Thanks a lot for being such a good friend.

The track of my Ph.D has been really tough both personally as well as professionally. There are few people who deserve a very special mention and I not only owe my thanks to them, rather, I owe my life to them. My wife Alvina Farooqui thanks for always being there, anywhere and everywhere, anytime and everytime. Your strong support has helped me come out of the roughest patches of my life. I would like to thank Mr and Mrs Kamlesh Singh for being my co-helpers and more so my buddies. Their support, encouragement, and companionship turned my journey into a pleasure. I will never ever forget all the efforts put in, just to make me smile. I would not have been able to survive without you guys.

This thesis can’t be complete without mentioning my family specially my father and mother. Their happy-go-lucky nature and enthusiasm at the fag end of my Ph.D, when one is low on energy and will-power, they were the ones who gave me the final booster to finish this work with a positive attitude. Thanks. Once again a penultimate and most heartfelt thank-you goes to my brother Atif Siddiqui and sister Amna Siddiqui for always being there when I needed them the most, and never
once complaining about anything or any task I gave them to do, they deserve far more credit than I can ever give them. Every bit of advice provided to me by my motivational, encouraging and able administrator my father, was a constant source of inspiration to look for solution to every problem during the course of the journey. Amma my pillar of strength, you would be the happiest person to see this moment in my life. Thanks a lot for all the prayers and nice food and motherly affection.

Thanks you all once gain............................

MOHAMMED HARIS SIDDIQUI
