Acknowledgements

First of all I would like to thank Almighty Allah without whose blessings I am nothing. For every beautiful moments of my life, I must not fail to thank Him immensely.

This thesis is the result of the encouragement, help, support, and the kindness of my esteemed supervisor Prof. Nafees A. Khan. No words can satisfy my sense of indebtedness, respect, gratitude and obligation for him. Since the beginning of my research he was the guiding pillar and his constant faith and encouragement benefitted me in every project or publications I achieved. It is his constructive criticism, fruitful discussion and critical analysis that have helped me to get this thesis in proper shape. I would like to cherish his source of inspiration and freedom to work throughout my career.

I am also thankful to Professor Mohd. Anis, Chairman, Department of Botany and ex-chairman Professor Arif Inam for providing necessary research facilities.

I appreciate the support and cooperation of my seniors Dr. Shabina Syeed and Dr. Rahat Nazar. Special thanks to my juniors Asim Masood, Md. Iqbal Raza Khan, Mohd. Asgher and Mehar Fatma for their encouragement and full support whenever I needed. Asim, Iqbal and Asgher specially helped me in every possible way they can.

I can’t afford to miss the great help which I received from my friends Rubina, Alka, Sana, Nigah, Yusuf, Gulshan, Farha Apa, Zehra Apa, Rose Apa, Leena Apa and Heena Apa. Especially I would like to thank Bushra for her constant help and support throughout the compilation of the thesis.

My parents were my constant source of inspiration. They always encouraged me and never let my spirit down through their warmth and unwavering support. They motivated me in every possible way.

I would like to extend my love and affection to my siblings Hena and Faria, brother Midhat Kareem, brother-in-law Dr. Abdul Rasheed, sister-in-law Arshi and Muneeba and my mother-in-law for their inspiring words.
The smile of my cute niece and nephew sundus and Ayaan always rejuvenated me and revised my spirit after hours of study. Special thanks are due to my eldest sister Rubina Iqbal whose guidance and motivation has always enlightened my path.

Thanks are also due to my husband Shah Imran Alam for his encouraging words, much needed moral support and understanding nature throughout the completion of the thesis.

I wish to express my utmost thanks to Rais Ahmad Khan for so patiently and painstakingly doing my statistical work.

I extend my regards and word of gratitude for all my well wishers, whom I have mentioned or not but I recognize their contribution directly or indirectly.

Lastly, the award of Research assistant by the Council of Science & Technology, Lucknow, BSR fellowship by UGC and SRF by CSIR is gratefully acknowledged.

(Noushina Iqbal)
