Acknowledgement

This thesis arose in part out of years of research that has been done since I came to Integral University. By that time, I have worked with a great number of people whose contribution in assorted ways to the research and the making of the thesis deserved special mention. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

First and foremost I would like to express gratitude and heartiest deep-felt thanks to ALMIGHTY ALLAH, the Creator of the mankind for giving me the opportunity to carry on research and making all my paths free of obstacles. I thank ALLAH SWT for His blessings as without the will of ALLAH the completion of my work would not have been possible.

Accomplishment of even a small piece of scientific work is possible only with the sincerest enlightenment of the path by the “MASTER” of the “STATE OF ART”. To express my gratitude even satisfactorily to such an eminent and noble Vice Chancellor Prof. S.W. Akhtar for providing us with good infrastructure facilities and encouragement.

I gratefully acknowledge Prof. S.M. Iqbal (Chief Academic Consultant) for inspiring my supervisor to do work on Nigella sativa. His involvement with his originality has triggered and nourished intellectual maturity of our laboratory that I will benefit from, for a long time to come.

My sincere thanks to Dr. I. A. Khan (Registrar) and Prof. T. U. Usmani (Pro Vice Chancellor) for their helpful suggestions in fulfilling all administrative formalities.
I am deeply grateful to Mr. Gufran Ahmad (Deputy Registrar, Acadamics and Administration) and Mr. Yusuf Kidwai for showing co-operation and support throughout my Ph.D. tenure right from the registration till the submission of my Ph.D. thesis.

I would like to gratefully acknowledge Dr. Qazi Shoeb (Dean of Faculty of Applied Sciences) for listening to me in all DRCs and Prof. Zilli (Dean of Faculty of Engineering) for his kind support.

I owe my most sincere gratitude to my Supervisor Dr. Iffat Zareen Ahmad (Head, Department of Biotechnology, Microbiology, Biochemistry and Bioinformatics, Integral University, Lucknow) who has inspired, encouraged and supported me throughout my thesis with her patience and knowledge allowing me the room to work in my own way. It has been an honour to be her student. I appreciate all her contribution of time and ideas and also finding in making my Ph.D. experience productive and stimulating. The joy and enthusiasm she has, for her research was contagious and motivational for me, even during tough times in the Ph.D. pursuits. I am also thankful for the excellent example she has provided as a successful woman and a teacher. One simply could not wish for ever smiling, better and friendlier supervisor!

I would like to record my gratitude to my co-supervisor Prof. (Dr.) Jamal M. Arif (Ex-Head of the Department of Biotechnology, Microbiology, Biochemistry and Bioinformatics, Integral University, Lucknow; Professor, Department of Biochemistry, College of Medicine, University of Hail, Hail, KSA) for his supervision, advice, and guidance from the very early stage of this research as well as giving me extraordinary experiences through out the work, which made him a backbone of this research and so to this thesis. His
truly scientist intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher. I am indebted to him more than he knows.

Collective and individual acknowledgments are also owed to all the faculty members, Dr. Neelam Pathak, Dr. Smita Verma, Dr. Mohtashim Lohani, Dr. Saif Khan, Dr. Rolee Sharma, Dr. Preeti Bajpai, Dr. Snober Mir, Dr. Sajid Khan, Dr. Salman khan, Dr. Irfan Ali Khan, Dr. Mohammad Imran, Er. Haris Siddiqui, Er. Alvina Farooqui, Er. Shazia Suhail, Er. Neha Srivastava, Ms. Roohi, Mr. Salman Akhtar Dr. Saheem Ahmad and Mr. Mohammad Kalim Ahmad Khan, who have helped and encouraged me with my work in the Department of Biotechnology.

It is a pleasure to pay tribute also to all lab staff Mr. Srikant, Mr. Azhar, Mr. Arif, Mr. Shahid, Mr. Shadif, Mr. Danish Rizwi, Mr. Danish Iqbal for their assistance and all lab attendants, especially Mr. Saraj, for their kind help and support throughout my study period.

It is also a pleasure to owe my loving thanks to all my lab mates Deepmala, Deeba, Ambreen, Uzma, Hayat, Jitendra, Saima and Sumaiya for creating a pleasant working atmosphere in the lab. Especially to Uzma and Hayat, whose presence was somehow perpetually refreshed, helpful, and memorable.

Where would I be without my family? Words fail me to express my appreciation to my husband Er. Kamal Ahmad whose dedication, love and persistent confidence in me, has taken the load off my shoulder. I owe him for being unselfishly let his intelligence, passions, and ambitions collide with mine.
My parents deserve special mention for their inseparable support and prayers. My Father, Er. Khalil Uddin Siddique, in the first place is the person who put the fundament, my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother, Mrs. Shahida, is the one who sincerely raised me with her caring and gentle love. Arif, Nasra and Rashid thanks for being supportive and caring siblings.

Last but not least, I was extraordinarily fortunate in having Anum and Deeba as my daughters. They have lost a lot due to my continuous engagement in research. Without their encouragement and understanding it would have been impossible for me to finish this work.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Aisha Kamal
