# CONTENTS

## Chapter 1 INTRODUCTION
1.1 Context of the study ................................................................. 1
1.2 Need and significance of the study ........................................... 13
1.3 Statement of the problem ......................................................... 14
1.4 Operational definitions.............................................................. 14
1.5 Objectives ............................................................................... 15
1.6 Hypotheses ............................................................................. 16

## Chapter 2 REVIEW OF LITERATURE
2.1 Introduction.............................................................................. 19
2.2 Prevalence of behavioural problems in dementia ....................... 21
2.3 Type of behavioural problems and individual prevalence of common behavioural problems ............................................. 36
2.4 Impact of behavioural problems................................................. 43
2.5 Management of behavioural problems....................................... 47
  2.5.1 Pharmacological management ............................................ 48
  2.5.2 Nonpharmacological management strategies ....................... 50

## Chapter 3 METHODOLOGY
3.1 Research design ...................................................................... 81
3.2 Population of the study ............................................................. 81
3.3 Sample .................................................................................... 82
3.4 Inclusion criteria ..................................................................... 83
3.5 Exclusion criteria ..................................................................... 83
3.6 Tools for data collection ............................................................. 83
  3.6.1 Neuropsychiatric Inventory.................................................. 84
  3.6.2 Clinical Dementia Rating Scale .......................................... 86
  3.6.3 Sociodemographic data sheet ............................................. 87
3.7 Data collection ................................................................. 87
3.8 Plan for analysis of data ............................................................. 90
Chapter 4. RESULTS AND DISCUSSION

4.1 Results .................................................................91
  4.1.1 Identification of dementia patients with behavioural problems ...91
  4.1.2 Prevalence of various behavioural problems in Alzheimer’s dementia cases screened for the study ..........92
  4.1.3 Prevalence of various behavioural problems in experimental and control group ................................94
  4.1.4 Effect of interventions on behavioural problems ..............96
  4.1.5 Correlation of behavioural problems and distress ..........100
  4.1.6 Effectiveness of management programme in reducing distress due to behavioural problems ..................101
  4.1.7 Severity of various behavioural problems ..................104
  4.1.8 Difference in reduction of behavioural problem scores between groups with moderate and severe behavioural problems .................................................................108
  4.1.9 Difference in reduction of distress between groups with moderate and severe behavioural problems ..........109
  4.1.10 Reduction in severity of each behavioural problem ........109
  4.1.11 Reduction in severity of distress related to each behavioural problem ..............................................109
  4.1.12 Difference in occurrence of behavioural problems and distress in relation to severity stage of dementia ....111
  4.1.13 Correlation of behavioural problems and distress with different sociodemographic variables ...............113
  4.1.14 Sociodemographic characteristics of persons screened for presence of behavioural problems ..................117
  4.1.15 Sociodemographic characteristics of subjects selected for the study ..............................................120

4.2 Discussion ...............................................................121
  4.2.1 Identification of dementia patients with behavioural problems .............................................................121
  4.2.2 Prevalence of various behavioural problems in Alzheimer’s dementia cases screened for the study ..........122
  4.2.3 Prevalence of various behavioural problems in subjects selected for the study ........................................125
  4.2.4 Effect of interventions on behavioural problems ............129
  4.2.5 Correlation of behavioural problems and distress ........133
Chapter 5 SUMMARY AND CONCLUSIONS

5.1 Introduction .......................................................... 141
5.2 Statement of the problem ........................................... 142
5.3 Objectives ................................................................ 142
5.4 Hypotheses ................................................................. 143
5.5 Research design .......................................................... 144
5.6 Population of the study ................................................ 144
5.7 Sample ....................................................................... 145
5.8 Tools for data collection ............................................... 145
5.9 Data collection .............................................................. 146
5.10 Analysis of data ........................................................... 146
5.11 Major findings of the study .......................................... 147
5.12 Limitations of the study ............................................... 150
5.13 Implications of the study ............................................. 152
5.14 Suggestions for further research ................................... 156
