ACKNOWLEDGEMENTS

This thesis was put together with the extensive support, motivation and inspiration of several people. Firstly, I would like to express my sincere gratitude to Prof. K. Ramakrishna for his guidance during my research. His continuous support and valuable suggestions have been made excellent content of this thesis. He is some that everyone will love due to his quick response, lively, and enthusiastic nature, which made everyone very interesting towards chemistry research.

I would like to thank all the professors of Department of chemistry, GITAM, who always welcome me whenever I visit to the institute of Science. All of you considered me as one of your GITAM’s family member.

A special thanks to Head of the department, Prof. M. Sarathchandra Babu, and Principal and Dean Prof. N. Lakshmana Das for giving me opportunity to extend my research in GITAM University.

I would like to extend my thanks to Prof. Anjali Jha, Prof. Anima and Prof. Uma Devi for extending their encouragement even though they were busy with their daily tasks; they were always available to guide me in my academic research. Although the non-teaching staff was not directly involved in the scientific activities, however, there was always an indirect support and any activity was difficult to complete without their help. So, I would like to thank all the non-teaching and administration staff for their support.

I owe a high sense of gratitude to my inspirable mentor Dr. Girish Dixit, Vice President, Eisai Pharmaceuticals India Pvt. Ltd, for giving constant encouragement, giving resources for research, and allowing me to use all sophisticated equipment. I can’t imagine the completion of my research without his support. I will forever be thankful to my family for their love, support and appreciate their patience throughout my studies.
