CHAPTER-III  DESIGN OF THE STUDY  78-114

3.1. Methodology  78-79

3.2. Description of the variables under study  79-80
  3.2.1. Operational variables  79
  3.2.2. Dependent variables  79
  3.2.3. Independent variables  79-80

3.3. Tools used in the study  80

3.4. Administration of the tools  80-81

3.5. Description of the tools used in this study and their scoring  81
  3.5.1. Family Environment Scale (FES)  81-85
  3.5.2. Mental Health Battery (MHB)  86-90
  3.5.3. Study Habits Inventory (PSSHI)  91-95
  3.5.4. Self confidence Inventory (ASCI)  95-97
  3.5.5. Academic Achievement  97

3.6. Selection of the sample  97
  3.6.1. Description of the universe and its elements  97
  3.6.2. Size of the sample  98
  3.6.3. Sample selection  98
    3.6.3.1. Selection of the institutions  98
    3.6.3.2. Selection of the sample  98
  3.6.4. Testing of the Representativeness of the Sample  102-112

3.7. Hurdles in data collection.  112

3.8. Statistical techniques employed  113
  3.8.1. Descriptive statistics  113-114
  3.8.2. Inferential statistics  114

CHAPTER- IV  ANALYSIS AND INTERPRETATION  115-205

4.1.-Nature of distribution of predictive variables under study  116-156
  4.1.1. Nature of distribution of Family climate scores  116-126
  4.1.2. Nature of distribution of Mental health scores  126-136
  4.1.3. Nature of distribution of Study habits scores  136-146
4.1.4. Nature of distribution of Self confidence scores 146-156

4.2- Analysis on the basis of correlation 156-164
   4.2.1. Correlation of Family climate and Academic achievement 159-160
   4.2.2. Correlation of Mental health and Academic achievement 160-161
   4.2.3. Correlation of Study habits and Academic achievement 162-163
   4.2.4. Correlation of Self confidence and Academic achievement 163-164

4.3- Analysis on the basis of Multiple regression. 164-171
   4.3.1. Determinants of Academic achievement of the total sample 164-166
   4.3.2. Determinants of Academic achievement of Science Respondents 166-168
   4.3.3. Determinants of Academic achievement of Arts Respondents 169-171

4.4- Establishing Regression Equation. 171-174
   4.4.1. Prediction of the criterion variable on the basis of predictive variables in relation to science stream group. 172-173
   4.4.2. Prediction of the criterion variable on the basis of predictive variables in relation to Arts stream group. 173-174

4.5- Analysis on the basis of ‘t’-Ratio. 174-205
   4.5.1. Comparison of Academic achievement between the respondents of science and arts stream. 174-176
   4.5.2. Comparison of male and female respondents of Science stream on the variable of Family climate. 176-179
   4.5.3. Comparison of male and female respondents of Science stream on the variable of Mental health 179-182
   4.5.4. Comparison of male and female respondents of Science stream on the variable of Study habits. 183-186

   4.5.5. Comparison of male and female respondents of
4.5.6. Comparison of male and female respondents of Science stream on the variable of Academic achievement. 188-190

4.5.7. Comparison of male and female respondents of Arts stream on the variable of Family climate. 190-193

4.5.8. Comparison of male and female respondents of Arts stream on the variable of Mental health. 194-197

4.5.9. Comparison of male and female respondents of Arts stream on the variable of Study habits. 197-201

4.5.10. Comparison of male and female respondents of Arts stream on the variable of Self confidence. 201-202

4.5.11. Comparison of male and female respondents of Arts stream on the variable of Academic achievement. 203-205

CHAPTER- V DISCUSSION OF RESULTS 206-218

5.1. Discussion of results on the basis of Product Moment Correlation. 206-208

5.1.1. Correlation of Family climate and Academic achievement. 206

5.1.2. Correlation of Mental health and Academic achievement. 207

5.1.3. Correlation of Study habits and Academic achievement. 207

5.1.4. Correlation of Self confidence and Academic achievement. 207-208

5.2. Discussion on the basis of Multiple Regression Analysis results. 208-209

5.3. Discussion on the basis of t-test results. 209-218

5.3.1. ‘t’ values between science and arts stream students
in relation to their academic achievement

5.3.2. ‘t’ values between male and female respondents of science stream on the variable of Family climate.

5.3.3. ‘t’ values between male and female respondents of science stream on the variable of Mental health.

5.3.4. ‘t’ values between male and female respondents of science stream on the variable of Study habits.

5.3.5. ‘t’ values between male and female respondents of science stream on the variable of Self confidence.

5.3.6. ‘t’ values between male and female respondents of science stream on the variable of Academic achievement.

5.3.7. ‘t’ values between male and female respondents of arts stream on the variable of Family climate

5.3.8. ‘t’ values between male and female respondents of arts stream on the variable of Mental health

5.3.9. ‘t’ values between male and female respondents of arts stream on the variable of Study habits.

5.3.10. ‘t’ values between male and female respondents of arts stream on the variable of Self confidence.

5.3.11. ‘t’ values between male and female respondents of arts stream on the variable of Academic achievement.
CHAPTER- VI FINDINGS, EDUCATIONAL IMPLICATIONS AND SUGGESTIONS

6.1. Findings

6.1.1. Findings related to major objectives

6.1.1.1. Relationship between various predictive variables and Academic achievement. 220

6.1.1.2. Contributory role of various predictive variables on the Academic achievement of total students. 220-222

6.1.1.3. Contributory role of various predictive variables on the Academic achievement of science students. 222-223

6.1.1.4. Contributory role of various predictive variables on the Academic achievement of arts students. 223-225

6.1.1.5. Prediction of the criterion variable on the basis of predictive variables in relation to science stream group. 225

6.1.1.6. Prediction of the criterion variable on the basis of predictive variables in relation to arts stream group. 226

6.1.1.7. Nature of the Distribution of Criterion and Predictive Variables Under Study. 226-228

6.1.2. Findings related to subsidiary objectives.

6.1.2.1. Comparison of the academic achievement of students of two faculties that is science and arts. 228

6.1.2.2. Comparison of the criterion variable (i.e. academic achievement) and predictor variables (i.e. family climate, mental health, study habits and self confidence) of male and female students.
of Science stream.  
6.1.2.2.1. Comparison of Family Climate of male and female science stream students.  
6.1.2.2.2. Comparison of Mental Health of male and female science stream students.  
6.1.2.2.3. Comparison of Study Habits of male and female science stream students.  
6.1.2.2.4. Comparison of Self confidence of male and female science stream students.  
6.1.2.2.5. Comparison of Academic Achievement of male and female science stream students.  
6.1.2.3. Comparison of the criterion variable (i.e. academic achievement) and predictor variables (i.e. family climate, mental health, study habits and self confidence) of male and female students of Arts stream.  
6.1.2.3.1. Comparison of Family Climate of male and female arts stream students.  
6.1.2.3.2. Comparison of Mental Health of male and female arts stream students.  
6.1.2.3.3. Comparison of Study Habits of male and female arts stream students.  
6.1.2.3.4. Comparison of Self confidence of male and female arts stream students.  
6.1.2.3.5. Comparison of Academic Achievement of male and female arts stream students.  
6.2. Educational Implications.  
6.3. Suggestions for further research.  
6.3.1. Topics suggested for future researches.
