My wife, My daughter, My parents, as well as other family members for their lasting love and support that enabled me to consolidate this research work.

Honorable Vice-Chancellor, Registrar, and all staff members of Research Section for their kind support by all means to complete this work.

All my friends, relatives and well-wishers for their affection, encouragement for the successful completion of my research work directly or indirectly.

TABLE OF CONTENTS

Abstract

List of Tables

1 INTRODUCTION

1.1 INTRODUCTION .............................................................. 1
1.2 EDUCATIONAL RESEARCHES .............................................. 1
  1.2.1 Quantitative Method of Research .................................. 2
  1.2.2 Qualitative method of Research .................................. 4
1.3 INDIAN EDUCATION SYSTEM ............................................ 4
  1.3.1 Levels of School Education in India ............................... 5
  1.3.2 Academic Performance of Students in School Education .......... 6
  1.3.3 Factors that Influence Academic Performance of Students ....... 7
    1.3.3.1 Demographic Factors ........................................... 7
    1.3.3.2 Academic Environment Factors ................................. 9
    1.3.3.3 Socio-Economic Factors ....................................... 11
1.4 DATAMINING ............................................................... 12
1.5 MODELLING ............................................................... 14
1.6 STUDENT PERFORMANCE MODELING ................................... 16
1.7 LIMITATIONS OF THE STUDY ........................................... 16
1.8 OBJECTIVES OF THE STUDY ............................................. 17
1.9 THESIS STRUCTURE .................................................. 18

2 REVIEW OF LITERATURE ............................................. 20
  2.1 INTRODUCTION .................................................... 20
  2.2 FACTORS THAT INFLUENCE THE ACADEMIC PERFORMANCE .... 20
  2.3 STUDENT PERFORMANCE MODELING .............................. 27

3 FEATURE SELECTION TECHNIQUES ................................. 34
  3.1 INTRODUCTION .................................................... 34
  3.2 DATA SOURCE ..................................................... 34
  3.3 FEATURE SELECTION PROCESS ............................... 42
      3.3.1 Subset Generation ......................................... 43
      3.3.2 Subset Evaluation .......................................... 45
      3.3.3 Stopping Criterion ......................................... 47
      3.3.4 Results Validation ......................................... 48
  3.4 FEATURE SELECTION: MODELS AND DIMENSIONS ............... 48
      3.4.1 Filter Algorithms ........................................... 50
      3.4.2 Wrapper Algorithms ........................................ 53
      3.4.3 Hybrid Algorithms ......................................... 54
  3.5 FRAMEWORK FOR FEATURE SELECTION ALGORITHMS .......... 54
  3.6 SELECTIVE FEATURE SELECTION COMPONENTS .................. 55
      3.6.1 Information Gain(ING) Attribute Evaluation .............. 56
      3.6.2 Gain Ratio Attribute Evaluation ............................ 57
      3.6.3 Correlation-based Feature Selection ....................... 57
      3.6.4 CHI-Square Attribute Evaluation ........................... 58
      3.6.5 Consistency Subset Evaluation .............................. 58
  3.7 EFFECT OF FEATURE SELECTION TECHNIQUES ON STUDENT DATA SET 59
      3.7.1 Filtered Feature Selection and Feature Ranking Techniques .... 59
      3.7.2 Wrapper Approaches to Feature selection ............... 70
      3.7.3 Hybrid Feature Selection Techniques ........................ 77

4 STUDENT PERFORMANCE CLASSIFIERS ............................ 91
  4.1 INTRODUCTION .................................................... 91
  4.2 CLASSIFIER PERFORMANCE ..................................... 92
      4.2.1 C4.5 Algorithm .............................................. 93
      4.2.2 Decision-Table ............................................... 94
      4.2.3 Multi-layer Perceptron ...................................... 95
      4.2.4 Bayesian Network ............................................ 96
      4.2.5 NaiveBayes .................................................. 97
  4.3 CLASSIFIER PERFORMANCE MEASURES ............................ 97
  4.4 CONSTRUCTION OF COST MATRIX ................................ 100
4.5 EVALUATION OF STUDENT PERFORMANCE PREDICTION MODELS

4.5.1 Evaluation of Student Performance Prediction Models with Two-Class

4.5.1.1 Evaluation of Two-Class Student Model based on Filtered Feature Subsets

4.5.1.2 Evaluation of Two-Class Student Model based on Wrapper Feature Subsets

4.5.1.3 Evaluation of Two-Class Student Model based on Hybrid Feature Subsets

4.5.2 Evaluation of Student Performance Prediction Models with Three-Class

4.5.2.1 Evaluation of Three-Class Student Model based on Filtered Feature Subsets

4.5.2.2 Evaluation of Three-Class Student Model based on Wrapper Feature Subsets

4.5.2.3 Evaluation of Three-Class Student Model based on Hybrid Feature Subsets

4.5.3 Evaluation of Student Performance Prediction Models with Five-Class

4.5.3.1 Evaluation of Five-Class Student Model based on Filtered Feature Subsets

4.5.3.2 Evaluation of Five-Class Student Model based on Wrapper Feature Subsets

4.5.3.3 Evaluation of Five-Class Student Model based on Hybrid Feature Subsets

4.5.4 Evaluation of Student Performance Prediction Models with Seven-Class

4.5.4.1 Evaluation of Seven-Class Student Model based on Filtered Feature Subsets

4.5.4.2 Evaluation of Seven-Class Student Model based on Wrapper Feature Subsets

4.5.4.3 Evaluation of Seven-Class Student Model based on Hybrid Feature Subsets

5 CONCLUSIONS
