ACKNOWLEDGEMENTS

To begin with, I would like to thank the Gracious Lord who has given me the strength and opportunity to fulfill my dream and blessed me with success on its path.

Then, I would genuinely express my gratitude to my research supervisor and guide, Dr. P. D. Vaidya, for orienting, instructing and maneuvering me through the research work. Without his excellent guidance, this work would not have reached its zenith. I consider myself fortunate to have been able to work under his supervision.

My sincere vote of thanks to Professor S. S. Bhagwat (Head, Department of Chemical Engineering) and Professor B. M. Bhanage (Head, Department of Chemistry) for being the jury in my Research Progress Review Committee (RPRC). I appreciate their timely help and valuable guidance during the RPRC meetings. I would also like to thank Professor V. V. Mahajani (also a part of the RPRC during my initial stages of Ph.D.) for his path-directing guidance.

I would also like to thank Professor G. D. Yadav, Professor A. B. Pandit, Professor V. G. Gaikar, Professor A. V. Patwardhan and all the other Faculty members of the Institute, who knowingly or unknowingly, have contributed to this successful work. Special thanks to the non-teaching staff of Chemical Engineering Department: Mr. Bhamare, Paralkar, Mane, Sawant, Vishal, Sathe madam, Mahesh Harkar, Mohite, Yadav, Bhole, the laboratory attendants and peons who have helped me during my research tenure.

I also honestly thank the non-teaching staff of General Office, Vice-Chancellor’s Office, General Engineering Department, Stores Department, Finance and Accounts; who have been quite helpful.

A friend is a person who believes in you even when you have ceased to believe in yourself. I am fortunate to have such good friends. I am highly obliged to Ankush Bindwal and Vinita Dubey for being my best buddies. Ankush has always been a philosopher and guide, thanks to his rational thinking which inspires me. Special thanks to Vinita for being very patient, understanding, caring and helpful. I am grateful to Vibhuti Dukhande for motivating me to take up this course. Thanks to
Yogesh Mirage for his vibrant and cheerful company. *Gracias* to my M. Chem. Engg. batchmates: Rushikesh, Prashanthi, Swapnil, two Sachins, Prasad, Ganesh, Rekha, Dinesh, Yogesh (Mama) for their constant support and encouragement.

Working in the research lab would not have been pleasant without the co-operation of my labmates. So, I would like to acknowledge Pushkar, Ravindra, Mahesh, Ashvin, Aanand, Ravi, Suhas, Abhimanyu, Amit, Vikram, Ganesh, Shirke, Atul, Ritesh, Santosh, Elizabeth Madam, Aniket, Chandu, Sanket, Anuj, Yuvraj, Nikhil, Azam, Shailendra for all the fun times we had in PDV lab. Thanks to Abhinav, Yash and Rahul (summer trainees) for their assistance in my research work. All the best to Devendra, Harini, Tanmayee, Munmee, Vaibhav, Nilam, Neha, Chetana, Deepak, Shrikant, Shailesh and Sachin. I wish them a bright future ahead.

The path to success lies through co-operation. So, my deepest gratitude to all from VKR Lab, VGG Lab and SSB Lab, for their tremendous help and support. I would also thank my friends from GDY Lab, AVP Lab and ABP Lab for their direct or indirect help (Not writing names, otherwise, it won’t fit in two pages).

It was a pleasure working as a Teaching Assistant (T.A.) to Professor Sahu from Maths Department. I thank him for teaching me C-programming.

I consider myself lucky to have been able to attend two international conferences during my Ph.D. tenure. It would not have been possible without the financial assistance provided by Department of Science and Technology (DST) for my travel to Netherlands (*ISCRE-22*) and Council of Scientific and Industrial Research (CSIR) for my travel to South Korea (*GLS-11*).

Finally, *merci* to the most important part of my life: *my family*. My mother and sister have been the backbone of my success. I salute to their patience and determination. Their love, support, guidance and blessings have boosted me to achieve my goal.

My candid apologies if I have missed out anyone. Once again, thanks to all those who have participated with me in the fruitful completion of my Ph.D.

- Parag N. Sutar
