ACKNOWLEDGEMENTS

Above all, I have to thank Lord Krishna who created us and gave us the mind to think and the ability to work.

In all the years I spent at the Institute of Chemical Technology, as a Ph.D student, there have been many events, stories, circumstances that have surrounded the work in lab, reading articles, classes, tests. All of them have contributed a little bit to making this possible. I am now taking the opportunity to thank all those people that have taken part in them, so here is the list of some of them (there is really no room for all of them).

I wish to express my gratitude to both my supervisors Prof. (Dr.) Prakash A. Mahanwar, and Dr. B. V. Sharma for their patience, guidance, encouragement, positive criticism, and supervision throughout this study.

My thanks are also to the staff of the Department of Polymer & Surface Engineering, as well as the staff of the M. M. Sharma Library, ICT for helping me whole-heartedly throughout the entire tenure of my work.

I owe my affection thanks to my parents, brother (Mayur) and sister (Rakhi) who inspired me during the course of this work. I have no befitting words to express my deep sentiments towards these people for their constant moral support and endless tolerance. Their love, affection and inspiration have always given me courage in difficult times.

I am especially grateful to my previous and current group-mates specially Merlyn Thandu, Kumudini Ghag, Shweta Umale, Pallavi Deshmukh, Vaishnaw Gharat, Bhuvanesw Sharma, Ulka Rane, Prarthana Dhanvijay, Kunal Yevole, Bhagwat Patil, Abha Sahu, Kumudini Lokhande, Chandan Fuke, Rupali Nehete, Rajesh Thakary, Roop Nath, Kasif Patel for helping me get through the difficult times, and for all the emotional support.

Vaishali, Sushil, Mukesh, Sunder who no matter what, when or where have always been my friends, and who continuously remind me of the reasons, why I always considered friendship so important.

Rakesh N. Patil
