LIST OF TABLES

1. Major Estuaries in Kerala
2. Various Physico chemical parameters analysed in the water samples of Poovar Vizhijam area along with the methods employed, instrument and reference used
3. Monthly variation in atmospheric temperature (°C) recorded at different stations of Poovar estuary
4. Two-way analysis of variance for the data on the atmospheric temperature
5. Monthly Variation in temperature (°C) of water samples recorded at different stations of Poovar estuary
6. Two-way analysis of variance for the data on the surface water temperature
7. Two-way analysis of variance for the data on the bottom water temperature
8. Monthly Variation in depth (cm) of water samples recorded at different stations of Poovar estuary
9. Two-way analysis of variance for the data on the depth (cm) of water samples
10. Monthly Variation in transparency (cm) of water samples recorded at different stations of Poovar estuary
11. Two-way analysis of variance for the data on the transparency (cm) of water samples
12. Monthly Variation in pH of water samples recorded at different stations of Poovar estuary
13. Two-way analysis of variance for the data on the pH of surface water samples
14. Two-way analysis of variance for the data on the pH of bottom water samples
15. Monthly Variation in salinity (ppt) of water samples recorded at different stations of Poovar estuary
16. Two-way analysis of variance for the data on the salinity (ppt) of surface water samples
17. Two-way analysis of variance for the data on the salinity (ppt) of bottom water samples
18. Monthly Variation in Electrical Conductivity (dS/m) of water samples recorded at different stations of Poovar estuary
19. Two-way analysis of variance for the data on the Electrical Conductivity (dS/m) of surface water samples
20. Two-way analysis of variance for the data on the Electrical Conductivity (dS/m) of bottom water samples
21. Monthly Variation in alkalinity (mg/L) of water samples recorded at different stations of Poovar estuary
22. Two-way analysis of variance for the data on the alkalinity (mg/L) of surface water samples
23. Two-way analysis of variance for the data on the alkalinity (mg/L) of bottom water samples
24. Monthly Variation in Dissolved Oxygen (mg/L) of water samples recorded at different stations of Poovar estuary
25. Two-way analysis of variance for the data on the Dissolved Oxygen (mg/L) of surface water samples
26. Two-way analysis of variance for the data on the Dissolved Oxygen (mg/L) of bottom water samples
27. Monthly Variation in free carbon di oxide (mg/L) of water samples recorded at different stations of Poovar estuary
28. Two-way analysis of variance for the data on the free carbon di oxide (mg/L) of surface water samples
29. Two-way analysis of variance for the data on the free carbon di oxide (mg/L) of bottom water samples
30. Monthly Variation in hydrogen sulphide (mg/L) of water samples recorded at different stations of Poovar estuary
31. Two-way analysis of variance for the data on the hydrogen sulphide (mg/L) of surface water samples
32. Two-way analysis of variance for the data on the hydrogen sulphide (mg/L) of bottom water samples
33. Monthly Variation in nitrite (mg/L) of water samples recorded at different stations of Poovar estuary
34. Two-way analysis of variance for the data on the nitrite (mg/L) of surface water samples
35. Two-way analysis of variance for the data on the nitrite (mg/L) of bottom water samples
36. Monthly Variation in nitrate (mg/L) of water samples recorded at different stations of Poovar estuary
37. Two-way analysis of variance for the data on the nitrate (mg/L) of surface water samples
38. Two-way analysis of variance for the data on the nitrate (mg/L) of bottom water samples
39. Variation in phosphate (mg/L) of water samples recorded at recorded at different stations of Poovar estuary
40. Two-way analysis of variance for the data on the phosphate (mg/L) of surface water samples
41. Two-way analysis of variance for the data on the phosphate (mg/L) of bottom water samples
42. Monthly Variation in silicate (mg/L) of water samples recorded at different stations of Poovar estuary
43. Two-way analysis of variance for the data on the silicate (mg/L) of surface water samples
44. Two-way analysis of variance for the data on the silicate (mg/L) of bottom water samples
45. Correlation matrix of different water physico-chemical parameters in Poovar-estuary at Station - I
46. Correlation matrix of different water physico-chemical parameters in Poovar-estuary at Station - II
47. Correlation matrix of different water physico-chemical parameters in Poovar-estuary at Station - III
48. Monthly variation in primary productivity (gC/m$^2$/day) of water samples recorded at different stations of Poovar estuary
49. Two-way analysis of variance for the data on the gross primary productivity of water samples
50. Two-way analysis of variance for the data on the net primary productivity of water samples
51. Various methods employed for the analysis of sediment samples.
52. Monthly variations of temperature (°C) of sediment samples recorded at different stations of Poovar estuary
53. Two-way analysis of variance for the data on the temperature (°C) of sediment samples
54. Monthly variations of pH of sediment samples recorded at different stations of Poovar estuary
55. Two-way analysis of variance for the data on the pH of sediment samples
56. Monthly variations in electrical conductivity (dS/m) of sediment samples recorded at different stations of Poovar estuary
57. Two-way analysis of variance for the data on the electrical conductivity (dS/m) of sediment samples
58. Monthly variations in total phosphorus (mg/kg) of sediment samples recorded at different stations of Poovar estuary
59. Two-way analysis of variance for the data on the total phosphorus (mg/kg) of sediment samples

vlll
60. Monthly variations in total nitrogen (%) of sediment samples recorded at different stations of Poovar estuary

61. Two-way analysis of variance for the data on the total nitrogen (%) of sediment samples

62. Monthly variations in organic carbon (%) of sediment samples recorded at different stations of Poovar estuary

63. Two-way analysis of variance for the data on the organic carbon (%) of sediment samples

64. Monthly variations in potassium (mg/kg) of sediment samples recorded at different stations of Poovar estuary

65. Two-way analysis of variance for the data on the potassium (mg/kg) of sediment samples

66. Monthly variations in sodium (mg/kg) of sediment samples recorded at different stations of Poovar estuary

67. Two-way analysis of variance for the data on the sodium (mg/kg) of sediment samples

68. Correlation matrix of different sediment physico-chemical parameters in Poovar-estuary at Station - I

69. Correlation matrix of different sediment physico-chemical parameters in Poovar-estuary at Station - II

70. Correlation matrix of different sediment physico-chemical parameters in Poovar-estuary at Station - III

71. Textural characteristics of sediments during post monsoon season at Poovar estuary

72. Textural characteristics of sediments during pre monsoon season at Poovar estuary

73. Textural characteristics of sediments during monsoon season at Poovar estuary

74. Occurrence and Significance of Trace Elements in Environment
75. Monthly Variation in cadmium content (ppm) of water samples recorded at different stations of Poovar estuary
76. Two-way analysis of variance for the data on the cadmium content (ppm) of surface water samples
77. Two-way analysis of variance for the data on the cadmium content (ppm) of bottom water samples
78. Monthly Variation in iron content (ppm) of water samples recorded at different stations of Poovar estuary
79. Two-way analysis of variance for the data on the iron content (ppm) of surface water samples
80. Two-way analysis of variance for the data on the iron content (ppm) of bottom water samples
81. Monthly Variation in lead content (ppm) of water samples recorded at different stations of Poovar estuary
82. Two-way analysis of variance for the data on the lead content (ppm) of surface water samples
83. Two-way analysis of variance for the data on the lead content (ppm) of bottom water samples
84. Monthly Variation in zinc content (ppm) of water samples recorded at different stations of Poovar estuary
85. Two-way analysis of variance for the data on the zinc content (ppm) of surface water samples
86. Two-way analysis of variance for the data on the zinc content (ppm) of bottom water samples
87. Monthly Variations in cadmium content (ppm) of sediment samples recorded at different stations of Poovar estuary
88. Two-way analysis of variance for the data on the cadmium content (ppm) of sediment samples
89. Monthly Variations in copper content (ppm) of sediment samples recorded at different stations of Poovar estuary
90. Two-way analysis of variance for the data on the copper content (ppm) of sediment samples
91. Monthly Variations in iron content (ppm) of sediment samples recorded at different stations of Poovar estuary
92. Two-way analysis of variance for the data on the iron content (ppm) of sediment samples
93. Monthly Variations in lead content (ppm) of sediment samples recorded at different stations of Poovar estuary
94. Two-way analysis of variance for the data on the lead content (ppm) of sediment samples
95. Monthly Variations in manganese content (ppm) of sediment samples recorded at different stations of Poovar estuary
96. Two-way analysis of variance for the data on the manganese content (ppm) of sediment samples
97. Monthly Variations in zinc content (ppm) of sediment samples recorded at different stations of Poovar estuary
98. Two-way analysis of variance for the data on the zinc content (ppm) of sediment samples
99. Seasonal variation of heavy metal content (µg/g dry wt) in fin fish recorded at different stations of Poovar estuary
100. Two-way analysis of variance for the data on the cadmium content of fin fish samples
101. Two-way analysis of variance for the data on the copper content of fin fish samples

xl
102. Two-way analysis of variance for the data on the iron content of fin fish samples
103. Two-way analysis of variance for the data on the lead content of fin fish samples
104. Two-way analysis of variance for the data on the manganese content of fin fish samples
105. Two-way analysis of variance for the data on the zinc content of fin fish samples
106. Seasonal variation of heavy metal content (µg/g dry wt) in shell fish recorded at different stations of Poovar estuary
107. Two-way analysis of variance for the data on the cadmium content of shell fish samples
108. Two-way analysis of variance for the data on the copper content of shell fish samples
109. Two-way analysis of variance for the data on the iron content of shell fish samples
110. Two-way analysis of variance for the data on the lead content of shell fish samples
111. Two-way analysis of variance for the data on the manganese content of shell fish samples
112. Two-way analysis of variance for the data on the zinc content of shell fish samples
113. Bio concentration Factor of Heavy metals in Fin fish
114. Bio concentration Factor of Heavy metals in Shell fish
115. Monthly distribution (TVC x 10^5 CFU/ml) of total heterotrophic bacterial count in the water samples recorded at different stations of Poovar estuary
116. Two-way analysis of variance for the data on the total heterotrophic bacterial count in the surface water samples
117. Two-way analysis of variance for the data on the total heterotrophic bacterial count in the bottom water samples
118. Total bacterial strains (CFU/ml) isolated from the water samples recorded at different stations of Poovar estuary

119. Two-way analysis of variance for the data on the total bacterial strains isolated from the surface water samples

120. Two-way analysis of variance for the data on the total bacterial strains isolated from the bottom water samples

121. Monthly distribution (TVC x 10^5 CFU/g) of total heterotrophic bacterial count in the sediment samples recorded at different stations of Poovar estuary

122. Two-way analysis of variance for the data on the total heterotrophic bacterial count in the sediment samples

123. Total bacterial strains (CFU/g) isolated from the sediment samples recorded at different stations of Poovar estuary

124. Two-way analysis of variance for the data on the total bacterial strains isolated from the sediment samples

125. Monthly distribution (TVC x 10^5 CFU/g) of total heterotrophic bacterial count in the fish sample recorded at different stations of Poovar estuary

126. Two-way analysis of variance for the data on the total heterotrophic bacterial count in the fish sample

127. Total bacterial strains (CFU/g) isolated from the fish sample recorded at different stations of Poovar estuary

128. Two-way analysis of variance for the data on the total bacterial strains isolated from the fish sample
## LIST OF FIGURES

1. Competing and conflicting demands on coastal water resources
2. Location Map of the study area showing sampling stations
3. Monthly variation in atmospheric temperature (°C) recorded at different stations of Poovar estuary
4. Monthly variation in surface water temperature (°C) recorded at different stations of Poovar estuary
5. Monthly variation in bottom water temperature (°C) recorded at different stations of Poovar estuary
6. Monthly variation in depth (cm) recorded at different stations of Poovar estuary
7. Monthly variation in Transparency (cm) recorded at different stations of Poovar estuary
8. Monthly variation in pH of surface water sample recorded at different stations of Poovar estuary
9. Monthly variation in pH of bottom water sample recorded at different stations of Poovar estuary
10. Monthly variation in salinity (ppt) of surface water sample recorded at different stations of Poovar estuary
11. Monthly variation in salinity (ppt) of bottom water sample recorded at different stations of Poovar estuary
12. Monthly variation in EC (dS/m) of surface water sample recorded at different stations of Poovar estuary
13. Monthly variation in EC (dS/m) of bottom water sample recorded at different stations of Poovar estuary
14. Monthly variation in Alkalinity (mg/L) of surface water sample recorded at different stations of Poovar estuary
15. Monthly variation in Alkalinity (mg/L) of bottom water sample recorded at different stations of Poovar estuary
16. Monthly variation in DO (mg/L) of surface water sample recorded at different stations of Poovar estuary
17. Monthly variation in DO (mg/L) of bottom water sample recorded at different stations of Poovar estuary
18. Monthly variation in carbon di oxide (mg/L) of surface water samples recorded at different stations of Poovar estuary
19. Monthly variation in carbon di oxide (mg/L) of bottom water samples recorded at different stations of Poovar estuary
20. Monthly variation in hydrogen sulphide (mg/L) of surface water samples recorded at different stations of Poovar estuary
21. Monthly variation in hydrogen sulphide (mg/L) of bottom water samples recorded at different stations of Poovar estuary
22. Monthly variation in nitrite (mg/L) of surface water samples recorded at different stations of Poovar estuary
23. Monthly variation in nitrite (mg/L) of bottom water samples recorded at different stations of Poovar estuary
24. Monthly variation in nitrate (mg/L) of surface water samples recorded at different stations of Poovar estuary
25. Monthly variation in nitrate (mg/L) of bottom water samples recorded at different stations of Poovar estuary
26. Monthly variation in phosphate (mg/L) of surface water samples recorded at different stations of Poovar estuary
27. Monthly variation in phosphate (mg/L) of bottom water samples recorded at different stations of Poovar estuary
28. Monthly variation in silicate (mg/L) of surface water samples recorded at different stations of Poovar estuary
29. Monthly variation in silicate (mg/L) of bottom water samples recorded at different stations of Poovar estuary
30. Monthly variation of primary productivity (gCm²/day) in water samples of Poovar estuary at Station I
31. Monthly variation of primary productivity (gCm²/day) in water samples of Poovar estuary at Station II
32. Monthly variation of primary productivity (gCm²/day) in water samples of Poovar estuary at Station III
33. Monthly variation of temperature (°C) in the sediment samples recorded at different stations of Poovar estuary
34. Monthly variation of pH in the sediment samples recorded at different stations of Poovar estuary
35. Monthly variation of electrical conductivity (dS/m) in the sediment samples recorded at different stations of Poovar estuary
36. Monthly variation of total phosphorus (mg/kg) in the sediment samples recorded at different stations of Poovar estuary
37. Monthly variation of total nitrogen (%) in the sediment samples recorded at different stations of Poovar estuary
38. Monthly variation of organic carbon (%) in the sediment samples recorded at different stations of Poovar estuary
39. Monthly variation of potassium (mg/kg) in the sediment samples recorded at different stations of Poovar estuary
40. Monthly variation of sodium (mg/kg) in the sediment samples recorded at different stations of Poovar estuary
41. Textural characteristics of sediments during post monsoon season at station -I
42. Textural characteristics of sediments during pre monsoon season at station - I
43. Textural characteristics of sediments during monsoon season at station - I
44. Textural characteristics of sediments during post monsoon season at station – II
45. Textural characteristics of sediments during pre monsoon season at station-II
46. Textural characteristics of sediments during monsoon season at station - II
47. Textural characteristics of sediments during post monsoon season at station - III
48. Textural characteristics of sediments during pre monsoon season at station-III
49. Textural characteristics of sediments during monsoon season at station - III
50. Textural characteristics of sediments during different stations in Poovar estuary
51. Monthly Variation in cadmium content (ppm) of surface water samples recorded at different stations of Poovar estuary
52. Monthly Variation in cadmium content (ppm) of bottom water samples recorded at different stations of Poovar estuary
53. Monthly Variation in iron content (ppm) of surface water samples recorded at different stations of Poovar estuary
54. Monthly Variation in iron content (ppm) of bottom water samples recorded at different stations of Poovar estuary
55. Monthly Variation in lead content (ppm) of surface water samples recorded at different stations of Poovar estuary
56. Monthly Variation in lead content (ppm) of bottom water samples recorded at different stations of Poovar estuary
57. Monthly Variation in zinc content (ppm) of surface water samples recorded at different stations of Poovar estuary
58. Monthly Variation in zinc content (ppm) of bottom water samples recorded at different stations of Poovar estuary
59. Monthly Variation in cadmium content (ppm) of sediment samples recorded at different stations of Poovar estuary
60. Monthly Variation in copper content (ppm) of sediment samples recorded at different stations of Poovar estuary
61. Monthly Variation in iron content (ppm) of sediment samples recorded at different stations of Poovar estuary
62. Monthly Variation in lead content (ppm) of sediment samples recorded at different stations of Poovar estuary
63. Monthly Variation in manganese content (ppm) of sediment samples recorded at different stations of Poovar estuary
64. Monthly Variation in zinc content (ppm) of sediment samples recorded at different stations of Poovar estuary
65. Concentration of heavy metals in fin fish during post monsoon season at different stations of Poovar estuary
66. Concentration of heavy metals in fin fish during pre monsoon season at different stations of Poovar estuary
67. Concentration of heavy metals in fin fish during monsoon season at different stations of Poovar estuary
68. Concentration of heavy metals in shell fish during post monsoon season at different stations of Poovar esturay
69. Concentration of heavy metals in shell fish during pre monsoon season at different stations of Poovar esturay
70. Concentration of heavy metals in shell fish during monsoon season at different stations of Poovar esturay
71. Percentage composition of microflora isolated from water, sediment and fish samples during the month October 2004 at station I
72. Percentage composition of microflora isolated from water, sediment and fish samples during the month November 2004 at station I
73. Percentage composition of microflora isolated from water, sediment and fish samples during the month December 2004 at station I
74. Percentage composition of microflora isolated from water, sediment and fish samples during the month January 2005 at station I
75. Percentage composition of microflora isolated from water, sediment and fish samples during the month February 2005 at station I
76. Percentage composition of microflora isolated from water, sediment and fish samples during the month March 2005 at station I
77. Percentage composition of microflora isolated from water, sediment and fish samples during the month April 2005 at station I
78. Percentage composition of microflora isolated from water, sediment and fish samples during the month May 2005 at station I
79. Percentage composition of microflora isolated from water, sediment and fish samples during the month June 2005 at station I
80. Percentage composition of microflora isolated from water, sediment and fish samples during the month July 2005 at station I
81. Percentage composition of microflora isolated from water, sediment and fish samples during the month August 2005 at station I
82. Percentage composition of microflora isolated from water, sediment and fish samples during the month September 2005 at station I
83. Percentage composition of microflora isolated from water, sediment and fish samples during the month October 2004 at station II
84. Percentage composition of microflora isolated from water, sediment and fish samples during the month November 2004 at station II
85. Percentage composition of microflora isolated from water, sediment and fish samples during the month December 2004 at station II
86. Percentage composition of microflora isolated from water, sediment and fish samples during the month January 2005 at station II
87. Percentage composition of microflora isolated from water, sediment and fish samples during the month February 2005 at station II
88. Percentage composition of microflora isolated from water, sediment and fish samples during the month March 2005 at station II
89. Percentage composition of microflora isolated from water, sediment and fish samples during the month April 2005 at station II
90. Percentage composition of microflora isolated from water, sediment and fish samples during the month May 2005 at station II
91. Percentage composition of microflora isolated from water, sediment and fish samples during the month June 2005 at station II
92. Percentage composition of microflora isolated from water, sediment and fish samples during the month July 2005 at station II
93. Percentage composition of microflora isolated from water, sediment and fish samples during the month August 2005 at station II
94. Percentage composition of microflora isolated from water, sediment and fish samples during the month September 2005 at station II
95. Percentage composition of microflora isolated from water, sediment and fish samples during the month October 2004 at station III
96. Percentage composition of microflora isolated from water, sediment and fish samples during the month November 2004 at station III
97. Percentage composition of microflora isolated from water, sediment and fish samples during the month December 2004 at station III
98. Percentage composition of microflora isolated from water, sediment and fish samples during the month January 2005 at station III
99. Percentage composition of microflora isolated from water, sediment and fish samples during the month February 2005 at station III
100. Percentage composition of microflora isolated from water, sediment and fish samples during the month March 2005 at station III
101. Percentage composition of microflora isolated from water, sediment and fish samples during the month April 2005 at station III
102. Percentage composition of microflora isolated from water, sediment and fish samples during the month May 2005 at station III
103. Percentage composition of microflora isolated from water, sediment and fish samples during the month June 2005 at station III
104. Percentage composition of microflora isolated from water, sediment and fish samples during the month July 2005 at station III
105. Percentage composition of microflora isolated from water, sediment and fish samples during the month August 2005 at station III
106. Percentage composition of microflora isolated from water, sediment and fish samples during the month September 2005 at station III
107. Panchayaths in Thiruvananthapuram District
108. Water borne diseases in Poovar area
109. Other diseases in Poovar area
110. Opinion about pollution in the study area
111. Waste disposal method
112. Septic tank facility in the houses
113. Distance of septic tank from the houses

LIST OF PLATES

Plate -I

(a) A close up view of beach resorts near Poovar – Bar mouth
(b) A view of estuarine reclamation in Poovar – Bar mouth

Plate -II

(a) A snapshot showing Poovar Bridge
(b) A beautiful view of Poovar Bridge.

Plate -III

(a) A snapshot showing Mavalakadavu Bridge
(b) A panoramic view of Mavalakadavu.

Plate -IV

(a) Fin Fish (Mugil Cephalus)
(b) Shell Fish (Penaeus Indicus)
