ACKNOWLEDGMENT

This PhD thesis could not have been possible without the assistance, understanding, and guidance rendered by numerous people throughout the tenure. The author would like to express her appreciation and gratitude to her supervisor, Dr. Neelima Satyam D., for her limitless support, tireless contributions and guidance throughout this research work.

Author is very thankful to Prof. Bhoominathan (IIT Madras), Dr. Suril Shah (IIIT-Hyderabad) for reviewing the PhD research proposal and giving the valuable suggestions in research and thesis for its improvement. The special thanks to IIIT professors, including Prof. Venkateswaralu and Prof. Pradeep Kumar Ramancherla for their timely guidance on the subject related to the research.

Furthermore, the author would like to thank staff and research students of the Geotechnical Engineering Laboratory (GTE). Special thanks go to Mr. Ravishankar Badry, Sr. Developer Arup INDIA Pvt. Ltd. for his remarkable help in all technical matters concerning the development of the code and the its implementation. Warm thanks to my friends and colleagues for sharing their time and friendship with the author and rendered precious help. The author also feels a deep sense of gratitude to all the academic and non-academic staff at the International Institute of Information Technology, Hyderabad for the extended help.

Words are not enough to thank my family for the support they have given during this long and sometimes very difficult journey. The author would very much like to express her love and gratitude to her Husband Mr. Ravishankar and her Mother-in-law for instilling in the value of learning and providing with the outstanding opportunities to do so throughout the life. Without their endless help, it would not be able to achieve and enjoy these successes. The special thanks to my kids Dhriti and Bhargav to give me permission for the higher studies by adjusting to the situation came across during PhD course works and the research.
