Acknowledgements

Pursuing a Ph. D project is both a painful and enjoyable experience. It is just like climbing a high peak, step by step, accompanied with bitterness, hardships, encouragements and trust with so many kinds people help. When I found myself at the top, I realized that it was in fact, team work that got me there. At the end of my thesis, it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me.

First and foremost, I would like to thank Almighty from the core of my heart for bestowing endless blessing upon me and helping me carry out my work successfully as no work is accomplished without His grace. He has given me the power to believe in myself and pursue my dreams.

At this point of accomplishment, I would like to give my sincere thanks to my honorific supervisor, Prof. H. N. Sheikh, who accepted me as his Ph.D. student. This work would not have been possible without his guidance, support and encouragement. Under his guidance, I successfully overcame many difficulties and learned a lot. Thereafter, he offered me so much advice and always guided me in the right direction. With profound obeisance, I gratefully acknowledge the expert guidance of Prof. Bansi Lal Kalsotra (retd.), University of Jammu, Jammu, for his moral encouragement, valuable suggestions and supporting attitude.

An equitable amount of indebtedness I owe to Prof. S. K. Pandey, Head, Department of Chemistry, University of Jammu, for the laboratory facilities and an easy access to the library. Besides I owe my thanks to all faculty members of the Department of Chemistry for their advice and valuable suggestions and to the non-teaching staff of the Department of Chemistry for their constant support and help.

I would like to take opportunity to thank my seniors Dr. Mohita Sharma, Dr. Balgar Singh, Dr. Simpy Mahajan and Dr. Rimpy Gupta who spent their time and shared their knowledge for helping me throughout my research work. Further thanks go to my junior colleagues, Swati Sharma, Mohd. Yawer, Rajinder singh, Jigmet Ladol, Muqaddus Kareim, Heena khajuria and Manish Sharma for their valuable suggestions.
I am indeed grateful to my colleagues and friends, Deepmala, Archana, Gurpreet, Pankaj, Pooja, Savit for their immeasurable support and encouragement during the course of this work.

Above all, I am grateful to my parents, Sh. R. C. Khajuria and Smt. Nirmal Sharma. Their love and understanding always encouraged me and motivated me to work harder and do my best. Their importance is ineffable and my unfeigned obeisance is for them “now and forever”. I am thankful to my brothers, Sumit and Rohit, who have always greeted my ways with smile and provided me encouragement, inspiration and unconditional support throughout my research work. Words alone cannot express my indebtedness to my husband, Dr. Sumit Sanotra for his continued support, encouragement and tolerance without which it would have been impossible to accomplish this goal. It is because of their good wishes, compassion, solace and blessings that I delivered the good in compiling the present document. They form the backbone and origin of my happiness and I owe my every achievement to them.

My loving thanks are also due to my nephew, Dhrish, whose cute smiling face has always relieved me of all my burdens during these hectic years and helped me to work for hours together tirelessly.

I am indebted to Dr. Vinay Kumar, Assistant Professor, School of Physics, Shri Mata Vaishno Devi University (SMVDU), Katra, for his help in recording the photoluminescence spectra of my samples. I am grateful to Director, SAIF, Punjab University, Chandigarh, for PXRD studies and STIC Kochi for SEM studies. My thanks are also due to Mr. Anurag Singh, Department of Anatomy, AIIMS, New Delhi, for TEM studies.

Lastly I would extend my thanks to all those who helped me in one way or the other in the completion of this thesis.

(Sonika Khajuria)
