Acknowledgement

Learning is the greatest adventure in life and I wish to express my gratitude to all those, who directly or indirectly, knowingly or unknowingly, encouraged and assisted in this episode of my academic development and for making this learning process stimulating, challenging and joyous for me.

The journey is commemorated with meeting of innumerable personalities who shaped the fabric of this work. At the fag end of my doctoral research, I feel that I was really fortunate to have the guidance and encouragement of my guide Dr. P. W. Khirade, Professor and Head, Department of Physics, Dr. Babasaheb Ambedkar Marathwada University, Aurangabad. I also felt that mere words of gratefulness perhaps will not be able to express my reverence to him. I owe my every achievement to him and shall remain obliged to him forever.

At the same time, I shall remain ever grateful to Dr. S.C. Mehrotra, Professor, Department of Computer Science and Information Technology, Dr. Babasaheb Ambedkar Marathwada University, Aurangabad, who welcomed me on board of his research group. It all started as a simple task, through some dielectric relaxation measurements and extending the range of applicability of an already developed theory, in a time turned into a real voyage. At that time, I never thought of going as deep into the theoretical aspects of dielectric as I am experience during research work.

I have no words to express my gratitude to Dr. S. S. Patil, Dr A. G. Murugkar who have contributed to my understanding of part of my research work. I would like to express my appreciation to Prof. M. D. Shirsat, Dr. P. B. Undre and Dr. G.M Dharne for being with me with their professional advice and will remember the jovious moments I shared with them in due course of research work.

I would like to thank Prof. K. M. Jadhav, Dr. V. V. Nawarkhele, Dr. R. P. Sharma, Dr. B. N. Dole, Dr S. S. Deshpande, Dr Smt. P. P. Pawar for their kind suggestions whenever it was required.
It’s my honor to have the kind affection and hospitality of Sou. Surekha Khirade during this journey that has never let me feel the distance of my home. I owe my deepest sense of appreciation towards her caring heart.

I am thankful to Prof M Malathi VIT University Vellore Tamilnadu, I am also thankful to Director School of chemical sciences NMU Jalgaon for their cooperation.

All the research colleagues of Microwave research lab Dept of Physics have helped me to make years in department into an interesting and enjoyable period of my life.

I am grateful to my colleagues Yuvraj Sudake, Siddarth Kamble, Mr. Kunal Datta, Mr. Prasanta Ghosh, and many more for their helping hand from time to time.

Finally, I pay homage from the deepest of my heart to my beloved mother Sou. Pratibha and father Shri. Prabhakar D Maharolkar, sisters Sonali and Mrs. Ashwini Abhijeet Pachkhede, brother Deepak Maharolkar, and all family members.

ARUNA P. MAHAROLKAR
