List of Tables

Table 1. Evolution of BI tools functionality. ............................................................... 7
Table 2. Types of BI. ................................................................................................. 8
Table 3. Comparison of past and present BI tool characteristics................................. 9
Table 4. Mapping of the questions to the research objectives & purpose of the study 63
Table 5. Response strategy of the questions. ............................................................... 63
Table 6. Business performance of select IT companies.............................................. 66
Table 7. Factor loading of constructs........................................................................ 71
Table 8. Composite Reliability and Average Variance extracted of Constructs. .......... 72
Table 9. Discriminant validity. .................................................................................. 72
Table 10. Result of reliability (Test-Retest Method) ................................................... 73
Table 11. Result of Cronbach’s alpha test for reliability............................................. 82
Table 12. Use of BI tools across organization.............................................................. 85
Table 13 Frequencies of respondent role for BI tool usage in the Org. ...................... 86
Table 14. Frequencies of BI tools implemented in the organization............................ 87
Table 15. Frequencies of objectives achieved after BI tool implementation.............. 89
Table 16. Descriptive statistics for objectives achieved after BI tool implementation. .................................................................................................................................................................................. 90
Table 17. Interpretation on objectives achieved after BI tool implementation............ 92
Table 18. Frequencies of challenges faced during BI tool implementation................. 96
Table 19. Descriptive statistics for challenges faced during BI tool implementation. 97
Table 20. Interpretation on challenges faced during BI tool implementation. .......... 99
Table 21. Frequencies of best practices followed during BI tool implementation... 102
Table 22. Descriptive statistics for best practices of BI tool implementation. ............ 103
Table 23 Interpretation on best practices followed during BI tool implementation. ... 106
Table 24. Case summary of source systems integrated into BI tool. ......................... 109
Table 50. Interpretation on attributes of BI tool information in the organization. .... 149
Table 51. Frequencies of quality of decision attributes before BI tool implementation. ................................................................. 152
Table 52. Descriptive statistics for quality of decision attributes before BI tool implementation. ........................................................................... 153
Table 53. Interpretation on quality of decision attributes before BI tool implementation. .................................................................................. 155
Table 54. Frequencies of quality of decision attributes after BI tool implementation. .......................................................................................... 158
Table 55. Descriptive statistics for quality of decision attributes after BI tool implementation. ........................................................................... 159
Table 56. Interpretation on quality of decision attributes after BI tool implementation. .................................................................................. 161
Table 57. Summary of interpretation of quality of decision attributes .................. 163
Table 58. Frequencies of business benefits before BI tool implementation.......... 164
Table 59. Descriptive statistics for business benefits before BI tool implementation ........................................................................... 165
Table 60. Interpretation on business benefits before BI tool implementation.......... 166
Table 61. Frequencies of business benefits after BI tool implementation............... 168
Table 62. Descriptive statistics for business benefits after BI tool implementation.. 169
Table 63. Interpretation on business benefits after BI tool implementation............. 170
Table 64. Summary of interpretation on business benefits.................................. 172
Table 65. Frequencies of increased usage of business analytics in decision-making in last 12 months. .................................................................................. 173
Table 66. Descriptive statistics of increased usage of business analytics in decision-making in last 12 months. .................................................................................. 173
Table 67. Frequencies of BI training received.................................................... 175
Table 68. Frequencies of understanding on analytics available in BI tool............. 176
Table 69. Frequencies of developing adhoc queries/reports.............................. 176
Table 70. Frequencies of increased usage of BI analytics. ........................................177
Table 71. Frequencies of development of leadership traits in manager. ..............178
Table 72. Descriptive statistics for development of leadership traits in manager. ....178
Table 73. Interpretation on development of leadership traits in manager. ..............180
Table 74. Frequencies of BI tool strategy/roadmap plan in the organization..........183
Table 75. Responses of use /plan of new technology in BI tool in the Organization.
................................................................................................................................184
Table 76. Frequencies of use /plan of new technology in BI tool in the organization.
................................................................................................................................184
Table 77. List of measured indicators of exogenous variable (BITI).....................189
Table 78. List of measured indicators of endogenous variable (QDM). ...............190
Table 79. List of measured indicators of endogenous variable (ORG). ...............190
Table 80. Fit indices of CFA model........................................................................191
Table 81. Fit Indices of SEM Model. .....................................................................192
Table 82. Significance of paths between variables...............................................193
Table 83. Skewness and kurtosis of decision attributes before & after BI tool ......195
Table 84. Result of t test of quality of decision-making attributes before & after BI tool ..............................................................................................................197
Table 85. Skewness and kurtosis of business benefits before & after BI tool ........201
Table 86. Result of t test of business benefits before & after BI tool .................202
Table 87. Value label between subjects factors....................................................205
Table 88. Descriptive statistics for decision categories........................................206
Table 89. Bartlett's Test of Sphericity. .................................................................207
Table 90. Box's Test of Equality of Covariance Matrices. ..................................207
Table 91. Multivariate Tests. ................................................................................207
Table 92. Tests of Between-Subjects Effects. .....................................................208
Table 93. Friedman test statistics usage for BI tool in decision-making categories..210
Table 94. Mean rank of usage for BI tool in decision-making categories............211
Table 95. Cross tab between quality decision-making and dynamic quality........213
Table 96. Cross tab between quality decision-making and confident quality. ........213
Table 97. Cross tab between quality decision-making and Sense of Service........214
Table 98. Cross tab between quality decision-making and charismatic & influential leader.................................................................................................................................214
Table 99. Cross tab between quality decision-making and motivated ................215
Table 100. Results of Chi-Square test for quality decision-making and leadership traits ........................................................................................................................................216
Table 101. Friedman test statistics of development of leadership traits in managers. ................................................................................................................................................219
Table 102. Mean rank of development of leadership traits in managers. ............220
Table 103. Result of relationship between importance and usage of analytics ......222
Table 104. Friedman test statistics of areas of usage for BI analytics..................224
Table 105. Mean rank of areas of usage for BI analytics. ....................................225
Table 106. Friedman test statistics of important BI analytics for quality decision-making.................................................................................................................................226
Table 107. Mean rank of important BI analytics for quality decision-making........227
